MACHETE FOR THE U. S. NAVY

(Scripps News Association)

Washington, D. C. April 10.—The machete, which was an implement of the Spanish troops in Cuba and the Philippines, appears destined to be adopted more generally by our own troops. Some five thousand of these huge knives have been issued to the troops in the Philippines, by whom they are to be used in cutting paths through the thick underbrush, rather than as weapons. They have become indispensable in that capacity, and it has now been decided, on the recommendation of the General Staff of the Army to extend the machete to field artillery troops at home and add that implement to the individual equipment of the light artillerymen in the field. The machete in such instances will be worn in a scabbard attached to the belt. The machete is considered of special value to members of the mountain batteries, of which there are several in this country, all of them destined sooner or later for duty in the Philippines.
