The Simplicity of Truth
AND WHY GREAT DISCOVERIES ARE OFTEN SO LONG DELAYED.—NOW DR. STILL CONCENTRATED ALL HIS FORCE ON ONE SUBJECT AND EVOLVED OSTEOPATHY.

When we think it all over we invariably come to the conclusion that the greatest and grandest, and most vitally important truths are the very simplest ones. Who of us all has not, coming upon a truth of this kind for the first time, marveled that it should so long have escaped him, that he should so often passed it by in thought without perceiving it?
Such a failure to follow thought to its rational conclusion is simply evidence that our minds have not been properly concentrated upon that particular subject. The calls upon our brain forces have been many and varied; so that we have been left without mental energy to grasp and encompass a truth—even when it is perhaps of the most vital importance to us. Yet when that truth is later laid before us we are likely to be disconcerted by its almost startling simplicity. It seems that we should have always known it.

When there comes a man who absolutely concentrates upon a single line of thought, sticking to it through thick and thin—simple truths are likely to be uncovered that have long escaped attention and whose finding enriches the world. Such a man is Dr. A. T. Still, whose researches brought Osteopathy into being, and who, in his young old age, is witnessing its increasing triumph over disease.
When a boy of ten, suffering one day from a sick headache, Dr. Still stretched himself upon the ground, pulling his neck upon a rope slung between two trees. Soon the headache and nausea disappeared; and in his autobiography Dr. Still declares this to have been his first real discovery in Osteopathy. He marvelled at the quick relief procured and followed the treatment whenever he had a headache for years afterward, with unvarying success. But it was not until he reached the age of thirty, when he had become an anatomist of no mean ability, that he began to understand WHY his headache disappeared under such treatment.

For fifty years Dr. Still has labored to master the workings of the body machinery—to acquire a perfect knowledge of anatomy and to learn new and effective ways of applying his knowledge. The science of Osteopathy, which treats and cures diseases of every character without the use of drugs, is the result of his researches. Its success has been great. More people are investigating the system and benefiting by it constantly; and the common wonder of all is why so simple and rational an application of anatomical knowledge and mechanics was not conceived and put into operation long before.

Manager Heisor failed to make a date with Spokane for next Sunday, but did succeed in getting a game arranged. Alcala will be here and cross bats with La Grande for the opening game. Alcala generally manages to put up a stiff game and because the team comes from a small burg is no sign that they cant play ball, and they may make it very interesting for the line-ups. Captain Segrist will have the line-up ready for publication to morrow.
