CHERRY CROP IS PROSPEROUS

From the last reports the canned goods and dried fruits on the Pacific coast are more nearly exhausted now than they have been at this season of the year, for many years, and the prices are firm. The prospects for all canning and drying enterprises are very favorable this season.

The Grande Ronde Valley, will this year, have 60 or 70 tons of Royal Anne and other white cherries that certainly ought to go to some cannery, even if local enterprise should fail to take hold of this most desirable project, as the demand has always greatly exceeded the supply.

ON CURING ACUTE DISEASES

It is a fact that in some parts of the United States Osteopathy is best known through its success in chronic cases, in which it is indeed more successful than any other system; but this arises from the circumstance that in the sections referred to the Osteopath has been given a chance only in chronic cases.

The system is ever more markedly superior in acute attacks of every kind; and the Osteopath welcomes such cases because by their cure he can more speedily prove the excellence of his method. At the Osteopathic colleges acute cases constantly being cured in record time; and in every quarter where the Osteopath has been given a full and fair trial he is the most successful of family doctors.

Appendicitis has little terror for him and is happily ended without drugs or the knife; all fevers are reduced by natural methods; pneumonia is cured; and every other form of acute attack is usually cured more quickly, and followed by a shorter convalescence, than when old methods are employed.

POTATOES ARE SCARCE

The general supply of old potatoes is getting low in all parts of the country and prices are rapidly advancing. The home supply is also very limited.
