PROSPECTS FOR ANOTHER INTER-OCEANIC CANAL

(Scripps News Association)

New York, July 2.—Considerable sensation has been caused by a report from Columbia, published in "La Soman," a Spanish Weekly, which states that the Bogota government has in contemplation a project for an inter-oceanic sea level canal through Dacten, a modification of the original plan of the Atrato Truando route. According to the private advices which bring this information, Columbia has been assured of the co-operation of various sister republics of Latin America.

The plans for the canal do not present any new engineering problem. More than half of the total cost, which is estimated, will be about \$70,000,000, would be for labor. The laborers will be soldiers of the Columbian army and contingents of soldiers from the other republics interested in the project, each country to pay its own men as if they were in actual service. This co-operation is to be paid for by shares of the stock of the canal and by certain franchises.

It is said that, as the canal would be an inter-American undertaking, and as it is wished to take precautions against any possible interference in its neutrality or the territorial integrity of Columbia, the project will be submitted to the Pan-American Congress at Rio de Janeiro under the section of the program referring to improvements of traffic facilities. The canal, it is believed could be finished by 1912, and President Reyes has hopes that the necessary capital will be available in Europe.

The depth of the Atrato and Truando rivers along the parts that would be used is from 35 to 40 feet. There would be twenty-one miles of excavation and a tunnel, two and three quarter miles long. Diego Mendoza, Columbian Minister to the United States, who is at present staying in this city, was asked about this report, but stated he had no official knowledge of it. Nevertheless the rumor is finding many believers in political and financial circles of this city.
