All the popular drinks at Hill's soda fountain.

**LA GRANDE SCHOOL OF MUSIC**  
PROF. DAY, PRINCIPAL.  
MRS. DAY, ASSISTANT.

This is one of the best musical institutions in the state, and that people in this city and valley are beginning to discover the advantage of this school. The system is the latest and most practical, and includes all the latest discoveries in the art of teaching music. The school is divided into two departments; No. 1 is for beginners from 5 years of more, and are taught one hour each day. This is no kindergarten system but far superior. In No. 2 the grades are from 5 to 15. Here they graduate. Pupils take one or two lessons a week as they desire. No scholars will be permitted to remain in this school who do not study.  
Opposite the Foley House over the candy store. Phone. 473.

## THEN--AND NOW

We all know the typewriter has come to stay. We discovered that long ago. It is only a question which typewriter, for the word is well and truly used in the singular sense.

The typewriter that has come to stay is not the one of ten years back, when innovation caused such a stir in business circles. Then nobody ever thought of associating the word "alignment" with a typewriter; it satisfied the user so long as the machine would write some fashion or other, and with constant break-downs ever-present repair bills were paid smilingly. But things are different now. Time tests all things. The business man has become wise. He wants what he pays for. He has learned the value (from dearly-bought experience) of a machine which will write properly, not only the day it is bought, but perpetually. He also wants to be satisfied upon the peculiarities of the many machines now before the public. The individual claims of our product places its position beyond all question, and the few particulars we give on the following pages will, no doubt be found of interest to those buyers who "want what they pay for"

### ABOUT THE OLIVER

The No. 3 Model, which has secured such a firm foothold on the universal markets, constitutes what is reckoned as the most perfect typewriter possible.

### WHY?

Here is our answer—

### IT WRITES IN SIGHT

There is no carriage to lift; no constructional parts to peer over. Your work is there—right before you.

### ALIGNMENT

Each type-bar is a double or U-shaped one and the alignment is secured thereby. No slots or so-called "guides" are necessary to preserve the alignment of the Oliver. The U-shaped type-bar does it.

### SIMPLICITY

In the construction of the Oliver less than one-half the usual number of parts is employed, consequently what there is to learn is learnt quickly.

### MANIFOLDING

The freedom of the Oliver type-bar permits of any desired force, so that in heavy manifolding equally good results are obtained first to last copy. From one to twenty copies can be made simultaneously, without materially increased exertion.

### STENCILING

No extra-heavy touch is needed to cut a perfect stencil on the Oliver. The ordinary touch is sufficient, therefore all risk of "cutting out" is avoided. The type of the Oliver cut the finest stencils possible.

### OPERATION

The Oliver never tires. Its operation is a pleasure, even when used without intermission. Its touch is beautifully elastic and most responsive. The fastest operator cannot overtake its speed.

### NON-LOCKING TYPE-BARS

The type-bars of the Oliver cannot lock, no matter how many keys be depressed at one time.

### TYPE CLEANING

The type of the Oliver are not, as with other machines, cleaned individually, but collectively, and the case with which this cleaning is done makes excuse for dirty type impossible.

### LINE RULING

Lines, either vertical or horizontal, and in any color, may be ruled upon paper whilst it is in the machine, and without the aid of a ruler. Ordinarily, any necessary ruling is left, of course, until it can be done in the usual way, but is usually forgotten.

### REMOVABLE CARRIAGE

The carriage is removed from the machine (for cleaning and other purposes) instantly, without manual interferences with any fastenings whatever, and is just as easily replaced.

### PAPER RELEASE

By a single movement absolute freedom is given to the paper, leaving it to be either straightened or otherwise moved in any desired position. No force is necessary, consequently no soiling or tearing of the paper occurs.

### CARD WORK

The Oliver typewriter will feed the stiffest and stoutest card as easily as a single sheet of paper.

### A WORD ON INVOICING

If there is anything which demonstrates

to the full the value of the Oliver for tabular work, it is invoicing. To those users of hidden-writing machines who attempt to satisfactorily prepare invoices thereon, the facility of such a task must, surely be apparent. Mechanical contrivances (known as "tabulators") have been devised, it is true, to assist them, but so much time is lost in "setting" the mechanism to which must be added the constant raising of the carriage (occasioned by the operator's lack of confidence in the tabulator), that the invoice could very well be written by hand in half the time. Furthermore, tabulators on other than Oliver typewriters, interfere very seriously with vital parts of the typewriter itself, rendering it very unreliable for ordinary use.

The Oliver is the ideal machine for invoicing. With its visible writing, permanent printing point, indicator and perfect release key, margins are instantly found and maintained—all with greatest simplicity. No tabulator is necessary on the Oliver, but, if one is wanted, we supply the best tabulator made. Bear in mind, however, that we save extra cost and give better results.

Again, with the wonderful manifolding power of the Oliver, it will make as many copies of an invoice as required, and every copy clear and distinct.

The use of an Oliver for invoicing insures—  
Speed, legibility, efficiency, economy, neatness and regularity.

The Oliver is already adopted by some of the largest business houses for invoicing as well as correspondence purposes, further particulars of which we shall be pleased to furnish on application.  
NEWLIN DRUG COMPANY, Agents.

**FREE! FREE!**  
**A CHANCE IN A LIFETIME**  
TO SEE PROF. BECKER, THE GREAT MAJESTIC CLEF, AND  
**The Wonderful Walking Cake**

You can depend on a  
**MAJESTIC RANGE**  
It bakes right because it is made right and of the right material—Malleable and Charcoal Iron.

At our store this week Professor Becker, the great majestic chef, will give free exhibitions of cooking with the great majestic family range. Professor Becker is one of the world's famous chefs, and is the author of the Great

Majestic cook book. He makes and explains the recipes of 83 different kinds of pastry. Recipes given for the saking.

**THURSDAY, FRIDAY and SATURDAY, AUGUST 23, 24, and 25, Between 2 and 5 p. m.**

On Friday afternoon between the hours of 2 and 4 o'clock, Professor Becker will make a large cake, 20 inches square and 6 inches high. The cake will be placed beneath a board upon which 20 ladies are requested to stand. The cake, like truth, crushed to earth, will rise again, as light and delicious as before it endured the trying ordeal. The Great Majestic is the one perfect range. It is not built of "talking points"; it consists of tested practical features. It is a fact, not a theory. It has been weighed and found not wanting; tested and found fault-

less; tried by time, used for years with perfect satisfaction and has made good in every way. It has been proved to be the best by the American people. The Great Majestic is the masterpiece of range construction. It is unequalled, the range by which all other ranges are judged, which has no real competitors, and which is more largely used in La Grande and vicinity than all other ranges combined. Cooking lessons begins Thursday and free Majestic lunches and cooking lectures will be given each day.
