Whose Say-so is Best?

With nearly all medicines put up for sale through druggists, one has to take the maker's say-so alone as to their curative value. Of course, such testimony is not that of a disinterested party and accordingly is not to be given the same credit as if written from disinterested motives. Dr. Pierce's medicines, however, form a single and therefore striking exception to this rule. Their claims to the confidence of invalids does not rest solely upon their makers' say-so or praise. Their ingredients are matters of public knowledge, being printed on each separate bottle wrapper. This invalid sufferers are taken into Dr. Pierce's full confidence. Scores of leading medical men have written enough to full volumes in praise of the curative value of the several ingredients entering into these well known medicines.

Amounts these writers we find such rook. With nearly all medicines put up for sale through druggists, one has to take
