**RACING FOR ROOSEVELT TROPHY CUP**

(Scripps News Association)

Marblehead, Mass., Sept. 3—The first of the five races to be sailed off Marblehead for the Roosevelt Cup is being sailed today. The races are held under the joint auspices of the Eastern Yacht Club of Mass., and the Kaiserlicher Yacht Club of Germany and three German boats are contesting for the Roosevelt Cup against an equal number of American boats, which were selected during the elimination races held a few days ago.

The American boats which are defending the Roosevelt Cup against the German challengers are the Auk, the Caramba, and the Vim. The Auk was designed by E. A. Boardman and is owned by Charles Francis Adams. The Caramba was also designed by Boardman and belongs to C. H. Foster, while the Auk was designed by William Gardner of New York and is owned by T. L. Park of the American Yacht Club. The yachts are limited in dimensions to 32 feet in length on the water line, beam and draught there is no time allowance. The sail area is limited to 550 square feet. Each yacht is required to carry a crew of not more than three who must be native born citizens of the country in which the yacht was built. The Roosevelt Cup goes to the owner of its yacht which first wins three races or wins the fifth race of the series.

**THEN—AND NOW**

We all know the typewriter has come to stay. We discovered that long ago. It is only a question which typewriter, for the word is well and truly used in the singular sense.

The typewriter that has come to stay is not the one of ten years back, when innovation caused such a stir in business circles. Then nobody ever thought of associating the word "alignment" with a typewriter; it satisfied the user so long as the machine would write some fashion or other, and with constant break-downs ever-present repair bills were paid smilingly. But things are different now. Time tests all things. The business man has become wise. He wants what he pays for. He has learned the value (from dearly-bought experience) of a machine which will write properly, not only the day it is bought, but perpetually. He also wants to be satisfied upon the peculiarities of the many machines now before the public. The individual claims of our product places its position beyond all question, and the few particulars we give on the following pages will, no doubt be found of interest to those buyers who "want what they pay for"

**ABOUT THE OLIVER**

The No. 3 Model, which has secured such a firm foothold on the universal markets, constitutes what is reckoned as the most perfect typewriter possible.

**WHY?**

Here is our answer—

**IT WRITES IN SIGHT**  
 There is no carriage to lift; no constructional parts to peer over. Your work is there—right before you.

**ALIGNMENT**  
 Each type-bar is a double or U-shaped one and the alignment is secured thereby. No slots or so-called "guides" are necessary to preserve the alignment of the Oliver. The U-shaped type-bar does it.

**SIMPLICITY**  
 In the construction of the Oliver less than one-half the usual number of parts is employed, consequently what there is to learn is learnt quickly.

**MANIFOLDING**  
 The freedom of the Oliver type-bar permits of any desired force, so that in

heavy manifolding—equally good results are obtained first to last copy. From one to twenty copies can be made simultaneously, without materially increased exertion.

**STENCILING**

No extra-heavy touch is needed to cut a perfect stencil on the Oliver. The ordinary touch is sufficient, therefore all risk of "cutting out" is avoided. The type of the Oliver cut the finest stencils possible.

**OPERATION**

The Oliver never tires. Its operation is a pleasure, even when used without intermission. Its touch is beautifully elastic and most responsive. The fastest operator cannot overtake its speed.

**NON-LOCKING TYPE-BARS**

The type-bars of the Oliver cannot lock, no matter how many keys be depressed at one time.

**TYPE CLEANING**

The type of the Oliver are not, as with other machines, cleaned individually, but collectively, and the case with which this cleaning in done makes excuse for dirty type impossible.

**LINE RULING**

Lines, either vertical or horizontal, and in any color, may be ruled upon paper whilst it is in the machine, and without the aid of a ruler. Ordinarily, any necessary ruling is left, of course, until it can be done in the usual way, but is usually forgotten.

**REMOVABLE CARRIAGE**

The carriage is removed from the machine (for cleaning and other purposes) instantly, without manual interferences with any fastenings whatever, and is just as easily replaced.

**PAPER RELEASE**

By a single movement absolute freedom is given to the paper, leaving it to be either straightened or otherwise moved in any desired position. No force is necessary, consequently no soiling or tearing of the paper occurs.

**CARD WORK**

The Oliver typewriter will feed the stiffest and stoutest card as easily as a single sheet of paper.

**A WORD ON INVOICING**

If there is anything which demonstrates to the full the value of the Oliver for tabular work, it is invoicing. To those users of hidden-writing machines who attempt to satisfactorily prepare invoices thereon, the facility of such a task must surely be apparent. Mechanical contrivances (known as "tabulators") have been devised, it is true, to assist them, but so much time is lost in "setting" the mechanism to which must be added the constant raising of the carriage (occasioned by the operator's lack of confidence in the tabulator), that the invoice could very well be written by hand in half the time. Furthermore, tabulators on other than Oliver typewriters, interfere very seriously with vital parts of the typewriter itself, rendering it very unreliable for ordinary use.

The Oliver is the ideal machine for invoicing. With its visible writing, permanent printing point, indicator and perfect release key, margins are instantly found and maintained—all with greatest simplicity. No tabulator is necessary on the Oliver, but, if one is wanted, we supply the best tabulator made. Bear in mind, however, that we save extra cost and give better results.

Again, with the wonderful manifolding power of the Oliver, it will make as many copies of an invoice as required, and every copy clear and distinct.

The use of an Oliver for invoicing insures—

Speed, legibility, efficiency, economy, neatness and regularity.

The Oliver is already adopted by some of the largest business houses for invoicing as well as correspondence purposes, further particulars of which we shall be pleased to furnish on application.

**A tragic finish**

A watchman's neglect permitted a leak in the great North Sea dyke, which a child's finger could have stopped, to become a ruinous break, devastating an entire province of Holland. In like manner Kenneth McIver, of Vanceboro, Me., permitted a little cold to go unnoticed until a tragic finish was only averted by Dr. King's New Discovery. He writes: "Three doctors gave me up to die of lung inflammation, caused by a neglected cold, but Dr. King's New Discovery saved my life." Guaranteed best cough and cold cure, at Newlin Drug Co. 50c and \$1.00. Trial bottle free.
