THE STAGE

Despite the telegraphic reports from St. Louis that Maude Fealy had been compelled to cancel her stock engagement on account of illness, the young actress will begin rehearsals of "The Illusion of Beatrice," as originally scheduled next Tuesday Sept. 28, at the Berkely Lyceum Theatre. Miss Fealy's starring tour under the direction of John Cort will begin at Orange N. J. Sept. 13, where the first performance of Miss Martha Morton's new comedy will be seen.

In these days of expensive productions and extravagances in stage dressing it will be a delight to see what is said to be handsomest production of the season "The Royal Chef" which comes to Stewart's Opera House is said to be the costliest production made by any manager this season. Putting on this musical comedy cost the Messers Shuber over \$25,000 and when it is seen here these figures will not be doubted in the least. The Shuberts are known for their expensive productness in dress and settings. In the "Royal Chef" are twenty-four different sets of costumes which are used by the chorus. These are all made of real silks and velvets. The society dresses which the show girls wear being imported from Paris by Mr. Lee Shubert; the dresses of the principals are all models of the latest gowns by Paquin. The court costumes worn in the production are expensive copies of robes worn by royalty.

CONTEST OVER THE

SCHOOL SUPERINTENDENCY

Underlying the session of the County School Institute is a very strong fight for the appointment to the office of county school superintendent of a successor of the late John A. Payton. The county court and board of commissioners now in session and who will make the appointment have already been flooded with many applications. Professor Traugher of Haines. Professor Sturgill of Haines and Professor Elms of Unity seem to be the leading candidates and their friends are making hot contest in their interests. Up to a late hour last night no appointment had been made.—Baker City Democrat.

THEN--AND NOW

We all know the typewriter has come to stay. We discovered that long ago. It is only a question which typewriter, for the word is well and truly used in the singular sense.

The typewriter that has come to stay is not the one of ten years back, when innovation caused such a stir in business circles. Then nobody ever thought of associating the word "alignment" with a typewriter; it satisfied the user so long as the machine would write some fashion or other, and with constant break-downs ever-present repair bills were paid smilingly. But things are different now. Time tests all things. The business man has become wise. He wants what he pays for. He has learned the value (from dearly-bought experience) of a machine which will write properly, not only the day it is bought, but perpetually. He also wants to be satisfied upon the peculiarities of the many machines now before the public. The individual claims of our product places its position beyond all question, and the few particulars we give on the following pages will, no doubt be found of interest to those buyers who "want what they pay for"

ABOUT THE OLIVER

The No. 3 Model, which has secured such a firm foothold on the universal markets, constitutes what is reckoned as the most perfect typewriter possible.

WHY?

Here is our answer--

IT WRITES IN SIGHT

There is no carriage to lift; no constructional parts to peer over. Your work is there—right before you.

ALIGNMENT

Each type-bar is a double or U-shaped one and the alignment is secured thereby. No slots or so-called "guides" are necessary to preserve the alignment of the Oliver. The U-shaped type-bar does it.

SIMPLICITY

In the construction of the Oliver less than one-half the usual number of parts is employed, consequently what there is to learn is learnt quickly.

MANIFOLDING

The freedom of the Oliver type-bar permits of any desired force, so that in heavy manifolding equally good results are obtained first to last copy. From one to twenty copies can be made simultaneously, without materially increased exertion.

STENCILING

No extra-heavy touch is needed to cut a perfect stencil on the Oliver. The ordinary touch is sufficient, therefore all risk of "cutting out" is avoided. The type of the Oliver cut the finest stencils possible.

OPERATION

The Oliver never tires. Its operation is a pleasure, even when used without

intermission. Its touch is beautifully elastic and most responsive. The fastest operator cannot overtake its speed.

NON-LOCKING TYPE-BARS

The type-bars of the Oliver cannot lock, no matter how many keys be depressed at one time.

TYPE CLEANING

The type of the Oliver are not, as with other machines, cleaned individually, but collectively, and the ease with which this cleaning is done makes excuse for dirty type impossible.

LINE RULING

Lines, either vertical or horizontal, and in any color, may be ruled upon paper whilst it is in the machine, and without the aid of a ruler. Ordinarily, any necessary ruling is left, of course, until it can be done in the usual way, but is usually forgotten.

REMOVABLE CARRIAGE

The carriage is removed from the machine (for cleaning and other purposes) instantly, without manual interferences with any fastenings whatever, and is just as easily replaced.

PAPER RELEASE

By a single movement absolute freedom is given to the paper, leaving it to be either straightened or otherwise moved in any desired position. No force is necessary, consequently no soiling or tearing of the paper occurs.

CARD WORK

The Oliver typewriter will feed the stiffest and stoutest card as easily as a single sheet of paper.

A WORD ON INVOICING

If there is anything which demonstrates to the full the value of the Oliver for tabular work, it is invoicing. To those users of hidden-writing machines who attempt to satisfactorily prepare invoices thereon, the futility of such a task must surely be apparent. Mechanical contrivances (known as "tabulators") have been devised, it is true, to assist them, but so much time is lost in "setting" the mechanism, to which must be added the constant raising of the carriage (occasioned by the operator's lack of confidence in the tabulator), that the invoice could very well be written by hand in half the time. Furthermore, tabulators on other than Oliver typewriters, interfere very seriously with vital parts of the typewriter itself, rendering it very unreliable for ordinary use.

The Oliver is the ideal machine for invoicing. With its visible writing, permanent printing point, indicator and perfect release key, margins are instantly found and maintained—all with greatest simplicity. No tabulator is necessary on the Oliver, but, if one is wanted, we supply the best tabulator made. Bear in mind, however, that we save extra cost and give better results.

Again, with the wonderful manifolding power of the Oliver, it will make as many copies of an invoice as required, and every copy clear and distinct.

The use of an Oliver for invoicing insures—

Speed, legibility, efficiency, economy, neatness and regularity.

The Oliver is already adopted by some of the largest business houses for invoicing as well as correspondence purposes, further particulars of which we shall be pleased to furnish on application.
