

REASON

Why go and buy a ready made suit when I can make you one just as cheap. Measured by an experienced tailor as it takes years to learn how to take measures and give a man a fit and a good suit. How can a clerk with no experience except to go by a book form, give you what you pay for?

EASTERN OREGON EXPERIMENT STATION

(Weekly Republican)
The Eastern Oregon Experiment Station, located at Union, is an institution that our people are decidedly interested in, and it behooves us to guard well our interests in this line. It is expected that the Executive Board of this institution, consisting of Senator Walter Pierce, of La Grande; J. S. Weatherford, of Albany; Crpt. Apperson, of Park Place, and John D. Daly, of Portland, will soon meet at Union, and that at that meeting several things will be done that are of vital interest to those of our people who are interested in keeping the Experiment Station at Union.

It is within the original intent of the Experiment Station projectors to make that institution one of co-operation between those in charge of the station and the farmers and stock-growers of the state, and to make this work effective there must be an appropriation sufficient to carry on the work in a manner commensurate with the importance of the topics that naturally come up for solution in such a place.

Some idea of the work of this station may be gleaned from a glimpse over a partial list of the grasses, flowers, forage plants and countless other items that are propagated and grown on the Experiment grounds. In looking over the farm one sees among the samples grown this season the thousand-headed kale, Bermuda grass, eight been varieties of sugar beets, various kinds of alfalfa, including the Turkestan, or dry-land alfalfa, fifty-five varieties of potatoes, seventy-five varieties of grasses, red clover, vetch, Egyptian clover, white clover, Reed Canary grass, Terrell grass, Italian rye, Japanese Barnyard millet, Kentucky blue grass, Brome grass, Sanfoin, Nevada blue grass, German alfalfa, white vetch, western wheat grass, ninety-eight varieties of grain, and countless other things that cannot be mentioned here.

As to the location of the institution, there is probably not another place in the State where the conditions are more favorable for carrying on these experiments than right here in the Grande Ronde Valley.

These things being true, it behooves our people to guard well our interests in this line, lest during a period of inactivity or neglect, steps be taken to change the location of the Experiment Station.

It is understood that at least two other parts of the State are laying plans to capture the big farm, and it is up to Union to keep the institution right where it is.

There are others after it.

DO WE CLAIM TOO MUCH?

We Osteopaths are accused by medical friends of claiming too much for Osteopathy. Possibly we do, but having repeatedly proved its merits, our judgment on the subject should be of more value than that of those who have not done so. To all such we can but reply in the words of Newton, who, when ridiculed concerning his theory of gravitation, said: "Sir, I have investigated these things; you have not."

Though all the common diseases, acute and chronic, infectious and noninfectious, have been treated Osteopathically, with the most encouraging results—it does not claim to be a cureall.

If it possessed but a small part of what is actually proved of it, it would yet rank as the greatest contribution to medical science. For medicine, especially in chronic ailments, offers nothing more than temporary relief, while Osteopathy, directing its efforts at the primary cause of disease, dares to offer, not only relief, but cure.

JEWELRY

Do You Want to Know

What You Swallow?

There is a growing sentiment in this country in favor of MEDICINES OF KNOWN COMPOSITION. It is but natural that one should have some interest in the composition of that which he or she is expected to swallow, whether it be food, drink or medicine.

Recognizing this growing disposition on the part of the public, and satisfied that the fullest publicity can only add to the well-earned reputation of his medicines, Dr. R. V. Pierce, of Buffalo, N. Y., has "taken time by the forelock," as it were, and is publishing broadcast a list of all the ingredients entering into his leading medicines, the "Golden Medical Discovery," the popular liver invigorator, stomach tonic, blood purifier and heart regulator; also of his "Favorite Prescription" for weak, over-worked, broken-down, nervous and invalid women.

This bold and outspoken movement on the part of Dr. Pierce, has, by showing exactly what his well-known medicines are composed of, completely disarmed all harping critics who have heretofore unjustly attacked them. A little pamphlet has been compiled, from the standard medical authorities, all the several schools of practice, showing the strongest endorsements by leading medical writers of the several ingredients which enter into Dr. Pierce's medicines. A copy of this little book is mailed free to any one desiring to learn more concerning the valuable, native, medicinal plants which enter into the composition of Dr. Pierce's medicines. Address Dr. Pierce as above.

Dr. Pierce's Pleasant Pellets are tiny, sugar-coated anti-bilious granules. They regulate and invigorate the Liver and Bowels. Do not bear the "pill habit," but cure constipation. One or two each day for a laxative and regulator, three or four for an active cathartic. Once tried always in favor.

\$50,000 GIVEN AWAY. In copies of "The People's Common Sense Medical Adviser," a book that sold to the extent of 500,000 copies a few years ago, at \$1.50 per copy.

Last year we gave away \$50,000 worth of these invaluable books. This year we shall give away \$50,000 worth of them. Will you share in this benefit? If so, send only 21 one-cent stamps to cover cost of mailing only, for book in stiff paper covers, or 21 stamps for cloth-bound. Address Dr. R. V. Pierce, Buffalo, N. Y.
