KIDNEY DISEASES

All that has been said above regarding the treatment of liver troubles applies with equal force to kidney affections.

PARALYSIS

This trouble, in all of its forms, signifies a cessation of nerve control in the affected parts. In cases of complete paralysis, in which there is an actual degeneration in the brain or spinal cord, little benefit may be expected, although even in such cases Osteopathy has done something and even reports of a few cures have been received.

Where the paralysis is but partial, however, showing that simply a certain set of nerves is affected, there is usually good hope under treatment. A displaced vertebra, a spinal curvature that has scarcely been noticed, or some similar misadjustment, may be pressing upon nerves and precluding the possibility of their doing their work normally. Many cases of complete cure are on record.
