Government ownership of railroads is attacked as a mere compromise with the logic of the situation by Charles F. Nesbit, Socialist, of Washington, D. C., who advances the startling proposal that the government should not only acquire the railroads, but should operate them free as to transportation of freight and equitability in carrying passengers. He would make railways as free as the highways, as open as the rivers, and promises that his plan would bring commercial equality which in the making would destroy practically every existent law of supply and demand, level land values, reduce the cost of living, dissipate monopoly and combinations and produce social and economic revolution. He pronounces the whole question one of taxation, and is very sure that with efficient, economical administration, there need not be a material increase in taxation in order to effect the purchase and management upon the lines of his remarkable plan.

COME GET THEM

If any foreign power desires military maps of the United States or any of its possessions, it need only send in a party of engineers to make them. There is no law on the statute books to prevent such action. The lack of legal protection is thrown into attention by the statement of General Wood that Japanese engineers are making maps in the Philippines. If German or French engineers should appear in New York state, or Mexican engineers in the Mississippi valley and commerce making military maps, nothing could be done, except possibly thru action by one to prevent one's property from trespass. If the connection between the spies and their governments could be shown, the United States could protest thru the diplomatic channels and speedily secure their withdrawal, but if the foreign government disavowed employment nothing could be done.

One of the splendid results of physical beautifying is its tendency to create an ambition to be beautiful in every way. When a woman gets a good start by taking Hollister's Rocky Mountain Tea she is all right. Tea or Tablets, 32 cents Newlin Drug Co.

CUBA MUST PAY

The 5,000 or more soldiers and 240 officers, who are now in Cuba are receiving extra pay at the expense of the Cubans. Under the law, officers receive an increase of ten per cent, and enlisted men an increase of twenty per cent for foreign service. It has been decided that the extra cost to the United States of sending the army to Cuba must come out of the Cuban treasury, and this extra pay, which will amount to over \$125,000, will doubtless be assessed against the Cuban government.

This rain is just what this county needs. The ground was exceptionally dry and these warm rains will soak the ground thoroly before it is frozen. Size it up from one year with another old Grande Ronde valley offers inducements second to none. The only drawback being the large holdings and with the introduction of irrigation these large tracks will be divided and subdivided, and hundreds of prosperous homes will be the result.
