FINE STEEL RANGES

If you are going to buy a steel range, come and examine our celebrated Majestic range. It is surprising at the small amount of fuel they consume and give perfect satisfaction. I also have a few heaters left. This is the time when you need them

Do not forget about carriage heaters. They will keep your feet warm on a long drive.

AN AWFUL MISTAKE

Some people think that an opportunity comes only once in a life time. But do not consider it an opportunity to consult a Traveling Optician who claims to be a specialist of 12 years experience, and who could not pass the State Optical examination April 11, 1906, at Salem, Oregon.
 The writer has had occasion to meet this optician at Salem, Oregon, April 11, 1906, where the State Board of Examiners in Optometry met for the purpose of examining three applicants for practice in the state. Two passed the examination, successfully; this traveling optician, being the one that failed, not receiving 75% average. In looking up the records I find that he took the examination Jan. 19, 1907, for the second time, passing this time successfully. Now is this a good record for one who has had 12 years experience?

If he understood his business thoroughly he would settle down in his own town, where he ranges all the work he can do. In regard to the grinding of lenses, will any one who can carry a machine around with them for that purpose, as the lightest machine one can get weighs something like 200 pounds and requires one to be able to use some power to run it. Can you wait satisfaction in the way of glasses get them at home where you can get them if they are not satisfactory, and of one who, if they are not satisfactory, will cheerfully refund your money.

O. M. Heacock, Optician.
