

AMERICAN-JAPANESE WAR POPPYCOCK SAYS BRAGG

(Scripps News Association)
Fond Du Lac, Wis., Feb. 6.—General Edward Bragg, formerly consul to Hong Kong today declared that all the talk of war with Japan was "poppycock." He said "The Japanese are the most insinuating, swell headed class of people on earth. This is due largely to their recent victory with Russia. A break between Japan and America is possible but not imminent. The recent boycott of American goods in China was caused largely by

Japanese who discovered they could not compete with American goods. To overcome the handicap they put a Japanese trade mark on American goods and sold them as their own products. Short-sightedness made them forget that the American brands were stamped on the inside of the packages. The California school question should be settled by California. One Chinaman is worth two Japanese as far as character and manhood is concerned."

OSTEOPATHIC COLLEGES VS. MEDICAL COLLEGES

New York and Philadelphia Medical Journal July 30, 1904.
Report on curricula of American Medical Colleges.
Submitted at the annual meeting of the National Confederation of State Medical Examining and Licensing Boards at Atlantic City N. J. June 1904 by Geo. W. Webster M. D. Chicago, V. Pres. Confederation. Report covered 124 Medical Colleges in U. S. (being nearly all).
Average number of months per year for 4 years in these 124 Colleges is 2 months or 28 months in full course. This includes all the large colleges in average.
Minimum number of months per year 6 months or 24 months in full course of 4 years.
Versus 9 calendar months per year in Osteopathic colleges or 27 calendar months in course of three years ex-

ceeding Minimum Medical course by 3 months and practically equaling average.—While exceeding average by additional time in studying surgery.
In 58 Medical Colleges term 6 months per year. In 4 Medical Colleges term 6½ months per year. Total 42 covering less time in 4 years than Osteopathic Colleges cover in 3 years. Standard Medical Course requires at least 3600 hours in full course.
Average Medical course requires about 4200 hours full course.
Three year Osteopathic course requires about 4800 hours in full course.
This exceedingly good showing is sufficient reason why the osteopaths of Oregon should receive the recognition they are seeking at the hands of the Oregon legislature.

CHILD AND WOMAN LABOR

(Scripps News Association)
Washington, Feb. 6.—The House judiciary committee today reported that congress has no jurisdiction or authority over the subject of woman or child labor. The interstate commerce laws have to do with the products after they are manufactured, says the report. It would be just as logical for congress to regulate the age, color, sex, dress and weight of the employee, and to fix hours of labor, as to exercise jurisdiction over the subject of woman or child labor.

The fitting of glasses should be done by one, who is a specialist, as many a good eye has been blinded by the folly of the patient intrusting their eyes to an incompetent or

Ordinary Optician

For the past 5 years on my periodical visits I have become well acquainted with Dr. F. E. Moore and I know he has observed the good work in fitting glasses I have done and will have no objections to my referring any one to him who is uncertain of my ability.
