CARNEGIE LIBRARY FOR BAKER CITY ASSURED

The following from the Baker City Democrat investigates the thought, "Why can't something like that happen to La Grande?"

Mayor Johns, at the last council meeting in this city, called attention to the fact that he had received a communication from Andrew Carnegie requiring some specific pledge for the maintenance of the library, and that he had received a resolution from him that he would have passed by the council. The resolution was in the following words:

"A resolution to accept the donation of Andrew Carnegie.

Whereas, Andrew Carnegie has agreed to furnish \$17,500 to the people of Baker City to erect a free public library building on condition that said Baker City shall pledge itself by resolution of council to support a free public library, at a cost of not less than \$1750 a year and provide a suitable site for said building, now, therefore, be it

"Resolved, by the council of the city of Baker City, That said Baker City accept said donation, and it does hereby pledge itself to comply with the requirements of said Andrew Carnegie.

"Resolved, That it will furnish a site for said library building and will maintain a free public library in said

building when erected, at a cost of not less than \$1750 a year.

"Resolved, That an annual levy shall hereafter be made upon the taxable property of said Baker City, sufficient in amount to comply with the above requirements."

The council passed the resolution without a dissenting voice.

FOUR LIGHTS NEAR DEPOT

The inconveniences caused by the absence of lights at the O. R. & N. depot during the light famine, has been partially relieved. Last night four strong street lamps were lighted and the full length of the platform was partially illuminated. The lights are of the type frequently used by railroad companies where electric lights are not available and emit enough light to obviate collisions be-

tween pedestrians about the depot platform.

Necessity is the mother of invention and so with business men of La Grande during the existing light famine. Light-making apparatuses of varied natures have been drafted into service, but the best substitute for electricity experimented with thus far is the gasoline lamp. The Selder candy store has installed one of these lamps and the brightness of the flame last evening elicited considerable comment.
