**Sewing Machines Repaired.**  
I will repair sewing machines of all kinds. Leave orders at Davis-Jordan Music store. Also agent for the reliable Wheeler & Wilson and Singer machines.  
3-1-4-1

## RUN TRAIN FOR FARMERS

It has been practically decided by the O. R. & N. and the management of the Washington state college at Pullman to run a farmers' train through Umatilla county during the first week in May, although some minor details remain to be completed as yet.

A second train is to be run through eastern Washington at that time and it is the intention of the management to continue the itinerary into Umatilla county, it is understood. If the train is run through Umatilla as intended, stops will be made at Milton, Weston, Athena, Adams, Pendleton, Echo, and possibly Hermiston.

At each of these places lectures will be given and practical demonstrations made, showing the waste of soil forces in growing one crop on soil continuously.

The train which was run through the Palouse district last month was a decided success and everything promises an exceptionally successful trip for the second train.

When the matter is finally decided upon arrangements will be made to advertise the train thoroughly and to entertain the party at the different places at which the train will stop.

**Objects of the Train.**  
The specific objects of the train and the lectures is set forth in a circular scattered from the train on the first trip through the Palouse district, as follows:

To awaken interest in the magnificent soil and natural resources of the Palouse country.

To help us remember that this great heritage must not be wasted but preserved and even made better for future generations.

To teach the wisest methods of soil treatment, to make the most out of it without loss.

To stimulate an interest in better crop production; better kinds of wheat; less smut; fewer weeds.

To impress the great economic fact that half time businesses never pay. Idle soil is wasted soil. Factories running on half time lose money.

Our soil is rich enough to grow a crop of some kind each year. Why not do it?

To show that while summer fallowing may appear necessary in a wheat growing system, it is poor business management.

To help us all to study out how we may still keep out wheat production and yet double our profits by growing something else on our summer fallow.

To press home the fact that our great railroads are anxious to help solve these problems and the state college is alive to the interests of the whole country.

### Testimonial.

National Livestock Association, Portland, Oregon.
