### Fat-Removing Exercise.

An excellent and highly effective exercise for the removal of abdominal fat is taken as follows: Lay flat on the back on the floor and place the hands at the sides. Catch the toes under something to keep the feet down and keep the knees stiff. It is well to catch the toes under the edge of the dresser, as there is no danger of this being moved by the exercise. Take a deep breath and rise slowly to a sitting position. Lower the body, slowly expelling the breath. Be careful not to overstrain the muscles while practicing these movements.
