Eruption of Vesuvius.
As a special night attraction for the thousands of people who will visit Portland during the Rose festival, Pain's "Eruption of Vesuvius" and "Carnival at Naples" will come direct from Manhattan Beach, New York, to Portland, giving seven performances in that city during the Rose festival week at the Multnomah Athletic field. This is without doubt the largest attraction that ever crossed the continent, and it shows more than anything we can remember, "the new Portland spirit." The Rose festival last season was only an experiment, but it was carried out so successfully that this year's entertainment is receiving the endorsement of not only every citizen of the city of Portland, but the entire northwest is interested.

Pain's "Eruption of Vesuvius" and "Carnival at Naples" is a large spectacular and fireworks production, and has been one of the largest drawing cards wherever presented in the east. There is nothing to compare with these summer night carnivals in the world of open air amusements and as presented by the famous pyrotechnic Pain, is without doubt the largest of its kind ever undertaken. Three hundred and fifty electricians, operators, stage managers and performers are with this production, and the scenery alone will cover more than five acres of space.

Wheat in Fine Condition.

According to the figures compiled by the crop reporting board of the bureau of statistics of the department of agriculture, the condition of Washington and Oregon's winter wheat sends the entire United States. In both states the condition of the crop on May 1 is given as 97, which in the case of Washington is two points above the condition at a corresponding date last year, and is five points above the condition of the 10-year average for the state and 11.2 points above the 10-year average for the United States. The condition of this year's crop is 8 points above this year's average for the entire country. The reports show that there was but 4 per cent of the total acreage abandoned and that 449,000 acres will be harvested. In California, 35 per cent of the total acreage has been abandoned and only 987,000 acres will be harvested.
