## RHEUMATISM CAN NOT BE RUBBED AWAY

Rubbing with liniments, blistering the affected parts, the application of plasters, and other means of external treatment, are usually helpful in relieving the pains and aches of Rheumatism, but such remedies do not reach the CAUSE of the disease, and are therefore in no sense curative. Rheumatism is due to an excess of uric acid in the blood, brought about by indigestion, poor bowel action, weak kidneys, and a general sluggish condition of the system. The circulation deposits this irritating poison in the different muscles, nerves, tissues and joints of the body, and soon the painful symptoms of Rheumatism are produced. The pains at first may be wandering and slight; but as the blood becomes more fully saturated with the uric acid poison, the disease grows worse and after awhile gets to be chronic. The slight, wandering pains now become sharp and cutting at the least exposure to dampness or night air, or any constitutional irregularity, the bones ache, the muscles are not as free in action as before, and where the acid poison is allowed to remain in the blood the joints often become so clogged with corrosive substances that they are left permanently stiff and useless. Rheumatism can never be rubbed away, nor can it be conquered and driven from the system until the acid-laden blood has been cleansed and purified. No other medicine does this so effectually as S. S. S. It dissolves and removes the impurities and sends a stream of rich, strong blood to the affected parts, which soothes the irritated nerves, inflamed muscles and flesh, and the sufferer obtains relief that is permanent because the real cause of the disease has been removed. Special book on Rheumatism and any medical advice desired free. THE SWIFT SPECIFIC CO., ATLANTA, GA.
