### Why Not Be Beautiful?

Every month the magazines published for women devote page after page to articles on beauty culture, telling how to improve the face and figure.

The manufacturers of face creams, lotions and cosmetics spend hundreds of thousands of dollars telling woman how she can beautify herself. It would take a hundred papers as big as today's Telegram to print even a part of all these "Beauty Talks," but probably the most sensible of the many formulas and receipts given by the beauty specialists is a simple wash that can easily be prepared by any woman in her own kitchen. The following are the directions for making:

Obtain at your drug store, Rose Water, two ounces; Cologne Spirits, one ounce; Eppotone (skin food), four ounces. Put the Eppotone in a pint of hot water (not boiling), and after dissolved, strain and let cool. Then add the Rose Water and the Cologne Spirits.

It is claimed for this home-made complexion wash that it will tone up the skin, making it soft and smooth and bring back the bloom of youth to even the most faded complexion.

At any rate, it is worth trying, as it is not expensive, and cannot possibly injure the most delicate skin.

### Payette Lakes Resort.

A large amount of travel to the Payette lakes is looked for this summer and preparations are being made for transporting Boise people who desire to take a few weeks' outing at this popular resort, says the Boise News. Manager Helgo of the P. & I. N. stated while in the city yesterday that with the new schedule which the Pony changes to June 7, people will be able to leave the Capital city in the morning and arrive at the lakes about 8 o'clock in the evening. He said that the pony will make close connections with the train from Weiser to Evergreen and that from Evergreen the stage line will be in operation to and from the lakes to connect with the P. & I. N. train, which will be first-class for travel this summer. The stage line will run daily except Sunday.

### Grande Ronde Mines.

It is gratifying to know, says the Baker City Democrat, that the Indiana Mining company, under the management of J. W. Messner, is meeting with splendid success in the operating of its property at the head of Grande Ronde river.

With a new mill in operation for the past two weeks, and in continuous operation, a large amount of concentrates is being turned out, and a force of 30 miners are pushing ahead for ore reserves that insure a long and profitable mill run.

Mr. Messner is certainly accomplishing great things, and the energy he has displayed in the interest of his company is deserving of all the success that is coming to him.

### Good Substitute.

On one of the southern railroads there is a station building that is commonly known by travelers as the smallest railroad station in America. It is of this station that the story is told that an old farmer was expecting a chicken house to arrive there, and he sent one of his hands, a newcomer, to fetch it. Arriving there, the man saw the house, loaded it on his wagon and started home. On the way he met a man in uniform with the words "Station Agent" on his cap. "Say, hold on. What have you got on that wagon?" he asked. "My chicken house, of course," was the reply. "Chicken house be hanged!" exploded the official. "That's the station!"—The Argonaut.

### Facts.

Deposits in the postal savings banks of Japan now exceed \$45,000,000. Manchuria already receives 1000 cable messages a day from Japan. The doubling of the cables is probable.

Here are some interesting figures given by the New York Herald for users of gas meters. In three months out of 2805 meters tested, after complaint, 524 were correct, 1820 were fast and 61 were slow.

There are now not far from 60,000 miles of railroad under block signal operation, nearly 10,000 miles of which have been added within a year and a half. All of this mileage is distributed among 84 different systems.
