PROGRAMS BEST YET

Now then, you must attend each of the electric shows at least once during the remainder of this week. Both programs are exceptionally good, and besides that, you will be adding to the lighting fund. And that's a worthy cause. It will be mighty nice when you come down town in the evenings to see our principal business blocks illuminated by hundreds of lights. Look here. Baker City, just about the time we began to talk about the illumination of our streets, concluded that the amount she had been spending in the same way had not been returned in value. So she cut out the incandescents. They were put back again after a very few days. That shows what the value of illumination is. Go to the electric shows. Help along.
