STODDARD LUMBER CO.

Farmers Suffer Heavily From Storm.
During the recent storm, five of the largest grain fields in the vicinity of Tygh ridge were damaged by a hail storm of unusual violence. These were those of Messrs. I. Rondeau, William Hunter, Owen Jones, Trudell & Dennis and E. Anderson, and situated on the summit of Tygh ridge. The storm swept across the Des Chutes divide. It is said, by those in the city yesterday from that district, leaving hail stones an inch in diameter, and that many drifts of hailstones were a foot deep in the gulleys. The grain was crushed to the ground, and it is feared that the crops so injured will be a full loss. North and west of the hail belt the only damage done was from the rush of water down the canyons, where in some instances, small buildings were swept away, and whatever could be moved and in the path of the storm was carried down with the waters. Aside from this the crops were uninjured by the rain and there was no large loss of stock.—The Dalles Chronicle.

R. B. Miller Home From the East.
General Freight Agent R. B. Miller of the O. R. & N., passed down the line today on his way home from a conference of the officials of the Harriman system in Chicago. The heat in Chicago and other eastern cities has been intense and Mr. Miller is delighted to be back in the invigorating climate of Oregon once more. Thousands of people are now looking toward Oregon and the movement toward the northwest will increase each year, according to Mr. Miller's observations.—Pendleton East Oregonian.

Killday Goes to Wallace.
Ed Killday, who was a member of the Walla Walla league team, left this afternoon for Wallace, Idaho, where he will play with the strong club of that city as a member of their pitching corps. Kill should have little trouble in retaining a permanent berth with the Wallace aggregation, as he has plenty of foolers and lots of smoke. If needed he will prove a strong man in the outfield, too, gathering in, as he does, all kinds of flies and in addition is quite handy with the willow.—Walla Walla Bulletin.

La Grande went dry June 1, but it was proven over one year ago that there is an abundance of pure, sparkling artesian water in less than 1000 feet below the surface. Why not have artesian city water?
