**THE ELEMENT OF SAFETY IN TREATMENT.**

Too much has the safety been left out of view in the treating of disease. Men probably reasoned that when there was so much danger anyway, a little more would not much matter. But would it not seem that this was exactly the reverse of the real truth? It is the last straw that breaks the camel's back. When there is already so much danger, it would seem to be the very last thing to add any more. Knowing what the world does know about drugs, what is the actual percent of danger compared with the percent of assurance in their use? That is the way to look at the question.

Medical men will tell you that the practice of medicine consists of much more than the use of drugs. True, but that is the only thing that distinguishes M. D.'s from osteopaths—that and the highly perfected osteopathic knowledge of the body. Osteopathy especially emphasizes this important element of safety in the treating of disease.—Osteopathic Health.
