A. J. Nusbaum, Batesville, Ind., writes: "Last year I suffered for three months with a summer cold so distressing that it interfered with my business. I had many of the symptoms of hay fever, and a doctor's prescription did not reach my case, and I took several medicines which seemed to only aggravate my case. Fortunately I insisted upon having Foley's Honey and Tar and it quickly cured me. My wife has since used Foley's Honey and Tar with the same success." A. T. Hill, druggist.

## WATER IS REQUIRED

(Continued from page 1.)

amount of production and price received is a fairly just scale to judge other sections by.

### Two Crops Sold.

Thus far this year only two crops are reported sold. Buyers are still reticent and, in fact, the market has not opened. This will soon be done, as several farmers today commenced to dig.

### Prices Quoted.

One crop has been sold, in the ground, for 75 cents and storage, which really amounts to 77 1/2. Another crop went for 65 cents. If this is taken as a basis for future sales, the market price will not be as paying as last year.

### Varieties Good.

The promising feature about the crop here this year is the fact that the potatoes are excellent—those that matured. There is no disease noticeable, and the short crop consists of remarkably fine grades. Therefore, all that is needed is water to make the Grande Ronde valley the chief "spud" producer in the state.
