WORK NEARS COMPLETION.

Construction Crews Are Rapidly Leaving Wallowa County.

The railroad construction work is nearing completion and one by one here are leaving, says an Enterprise paper. Saturday's train carried no less than 50 of the Greeks who have been working here to the main line, a number more were on Monday's train. and scarcely a train leaves that does not carry away some of the timekeepers, surveyors, or foremen of the different gangs. The depot is rapidly nearing completion and within the next week will be occupied by the operating department.

Simmons' crew, which has been putting in the bridge at River Junction, finished their work last week and Sunday departed for the outside. Woodard's camp, consisting of the steel gang and the surfacing crew, left Saturday, and Monday afternoon the P. D. Grant crew which curved the steel and later put in the water system and surfaced the yard at this place, packed their things in the cars and moved.

Meantime work on the depot is goin gon merrily. Fisher and Petrie, the contractors, expect to be able to turn by the 15th of the month.

The railroad company has a force of men at work on the sidewalk from the end of the city walks on Storie street to the depot. The walk will be ompleted today or tomorrow.

Snider's bridge crew left Wednesday and now only two bridge crews are left. In all, over 200 men have been discharged already this month.

The ballast is spread from Losting to River Junction and as soon as a thaw comes in the spring the track will be raised to the proper height. The track is side-surfaced from Lostine to Joseph, and a good gravel roadbed supports it all the way. Within a few days Mr. Brandon expects to divide the work among five section crews of 15 men each and distribute them along the line. The wrok will be completed at the Wallowa depot within a few days.
