

Health is More Expensive Than Any Cure.

This country is now filled with people who migrate across the continent in all directions seeking that which gold cannot buy. Nine-tenths of them are suffering from throat and lung trouble or chronic catarrh resulting from neglected colds, and spending fortunes vainly trying to regain lost health.

How One Doctor Successfully Treats Pneumonia.

"The amazing pneumonia," says Dr. W. J. Smith of Sanders, Ala., "the only remedy I use for the lungs is Chamberlain's cough remedy. While, of course, I would treat other symptoms with different medicines, I have used this remedy many times in my medical practice and have yet failed to find a case where it has not controlled the trouble."

Oregon Agricultural College, Corvallis, Dec. 21.—(Special.)—Are you interested in the development of your community? Do you want to know how to make farming more pleasant, easier and more profitable?

These questions are of particular significance to the farmers of this state at this time for the reason that many of the problems suggested by them may, in a measure at least, be solved and reduced by participation in the institutional and instructional work which will be offered by the Agricultural college during the months of January, February and March.

Special courses extending from 10 days to 40 days will be given in dairying, horticulture, mechanic arts, household science and art, and creamery practice. The work in all of these courses is designed to give those in attendance a knowledge of and practice in the most modern and successful methods of scientific farming.

offered this year for the first time. It is designed to offer advanced instruction to experienced creamery operators. It will be under the direction of specialists lately from an extended trip through Wisconsin, Illinois, Michigan and Iowa, where they conducted investigations of dairying conditions and the latest most advanced methods of dairying as given by the dairy schools of these states.

The course in dairying will extend over a period of 10 weeks, beginning January 18. It will be in charge of the college instructors and is designed to familiarize students with the modern forms of dairy apparatus and teach the underlying principles of production, care and manufacture of milk into butter and cheese.
