A Sprained Ankle.
As a rule a man will feel well satisfied if he can hobble around on crutches in two or three weeks after spraining his ankle, and it is often two or three months before he is fully recovered. This is an unnecessary loss of time, as by applying Chamberlain's Liniment, as directed, a cure may as a rule be effected less than one week's time, and in many cases within three days. Sold by all good dealers.

A Common Cold.

We claim that if catching cold could be avoided some of the most dangerous and fatal diseases would never be heard of. A cold often forms a culture bed for germs of infectious diseases. Consumption, pneumonia, diphtheria and scarlet fever, four of the most dangerous and fatal diseases, are of this class. The culture bed formed by the cold favors the development of the germs of these diseases, that would not otherwise find lodgment. There is little danger, however, of any of these diseases being contracted when a good expectorant cough medicine like Chamberlain's Cough Remedy is used. It cleans out these culture beds that favor the development of the germs of these diseases. That is why this remedy has proved so universally successful in preventing pneumonia. It not only cures your cold quickly, but minimizes the risk of contracting these dangerous diseases. For sale by all good dealers.

For That Terrible Itching.

Eczema, tetter and salt rheum keep their victims in perpetual torment. The application of Chamberlain's Salve will instantly allay this itching and many cases have been cured by its use. For sale by all good dealers.

WARM NIGHT ENDS STORM

While the center of the valley saw the worst sandstorm in the history of the county yesterday—judging from reports by pioneers—the night settled the wind that has been blowing for days in La Grande, too. The temperature during the night varied between 53 and 40 above, an extremely high point for a February night.

Island City was given a touch of the sandstorm yesterday, demonstrating how near the storm was general in the valley. On the Sandridge inhabitants were menaced for several hours by the constant hammering of the sand.

THE DOCTOR OF OSTEOPATHY.

What His Title Means—How He Gets It—Particular Abilities Acquired in His Long Career.

The graduate of a recognized college of osteopathy, after a long and exhaustive study of the highest authorities in anatomy, physiology, pathology, diagnosis, therapeutics, and all kindred branches, is awarded a diploma that gives him the legal right to the title of Doctor of Osteopathy. That is the only title that he wishes for he makes no pretense of teaching medicine, the word medicine being generally accepted as meaning drugs.

The abbreviation, of the title of doctor of osteopathy is D. O., and the province of the D. O. is to help nature in the human body, to right herself. He believes that drugs are not only unnecessary, but distinctly damaging and that the body is a very perfect machine that will run along smoothly if supplied with proper fuel (food), and if none of the parts get out of position.

But while the most perfect of machines, it is also the most delicate, and derangement of its parts can be brought about in scores of ways. Falls, jars, strains, undue exertions, and local contractions or relaxations due to changes in temperature, are only a few of the things that may cause trouble in this delicate mechanism. Sometimes the effects are immediately apparent, sometimes long delayed.

It is for the especial work of finding the derangement and rectifying it that the osteopathic physician is trained. He is a master mechanic, and when anything is wrong with a machine it is the master mechanic whose services should be called in. If some little part has slipped out of place, the resulting trouble may be at a distant part of the mechanism, and any but the trained expert would be likely to attempt repairs in the wrong place and work further damage. But the skilled workman does nothing until he has made thorough examination and found that little part that has slipped out of place. Then his training enables him to replace it. That is the work of the osteopathic physician—Osteopathic Advocate.
