spelling out the more difficult words phonetically on the margin of the bill. Two clerks, alternating each half hour, read the 55,000 words of the bill in just 4 hours and 20 minutes. For a time one of them kept up a pace of 234 words a minute.

One government official, who is connected with the administration of a dependency of the United States situated in the tropical zone when asked as to his sentiments in regard to the bill, declared:

"Well, the only thing I can understand in it is that it will cost me more hereafter to hand some one a lemon."

Congressman Thomas of Ohio, is struggling with a tariff puzzle that involves the question—When is a fish-hook not a fishhook?

A company in his district that manufactures the hook has appealed to him to straighten out a tangle in the tariff. According to the information that reaches Thomas, the Dingley bill placed a duty on fish-hook that was high enough to foster the industry of the country. Troubles afterwards arose, however, over the construction of the law. The treasury department classified the hooks as wire and admitted them at a greatly reduced rate of duty. Hooks with flies, of feathers, and gay colored silk attached came in as featherbeds and as silk. Now the hook manufacturers demand that they be given a section of the bill devoted entirely to fishhooks and with a protection duty attached.

S.S.S. CURES CHRONIC ULCERS

Any chronic ulcer shows an unhealthy and impure condition of the blood. It is a diseased condition of the flesh at that particular spot, caused and kept inflamed and irritated by a continual discharge into it, of unhealthy matter from the circulation. No treatment can have any curative effect except a medicine which will renovate the blood and entirely remove the cause. Salves, washes, lotions, etc., are sometimes helpful in reducing inflammation, cleansing the ulcer, or perhaps lessening the discharge, but such applications do not reach the blood where the disease germs are located and can never effect a cure. S. S. S. goes down into the circulation, drives out all impurities and morbid matter, and by nourishing the flesh with rich pure blood causes the place to heal naturally and permanently. S. S. S. does not make a surface cure, but by beginning at the bottom, and rebuilding broken-down tissue, and supplying healthful, healing qualities to the blood, causes the place to fill in with new, firm flesh, while it steadily but surely effects a permanent cure. The ulcer can not exist when the blood is pure, and S. S. S. will thoroughly purify the blood. Book on Sores and Ulcers and any medical advice free to all who write. THE S.W.
