The idea is to keep your teeth in a normal condition and this cannot be done without the aid of a dentist. This is an age when it is possible to keep the natural teeth until the time comes when you no longer need them, provided you look after them in time. Modern methods of treatment make this possible. Remember nothing can quite take the place of the natural.

Do not think because a tooth has an abscess at the root that you must lose it. In a large majority of cases it can be saved. Be reasonably sure that your Dentist knows his business. A college training on theory is absolutely necessary if the best service is to be rendered. Practice is good but theory worked out into practice is better. My motto is "The Greatest Good to the Greatest Number."
