CONTRACT LET FOR GRADING

Yesterday evening the street committee of the council awarded the contract for the grading of the courthouse grounds to Chas. Tall, the consideration being \$800. This is joint work, both county and city bearing the expenses equally. There is a considerable quantity of dirt to be removed and several hundred yards of rich loam to be hauled for top dressing. The grounds are to be sown with lawn grass and shade trees are to be set out. Within a few years the court house yard will furnish a nice little

park. The original idea has been that when the jail is full of prisoners during the summer months that the inmates would keep it mowed, but if present conditions prevail as they have during the past few months, the lawn would become neglected, for we have not had an inmate in the jail for over two months—we did have for a few days, but it became so lonesome that he broke out.

"The Mills of The Gods."

On next Monday, May 10 at Stewards Opera House, this New York Astor theatre success will be produced with the metropolitan cast and production that made it one of the successes of last season. This company, under the management of Mr. Ernest Shuter, is making a tour of the large western cities, and is creating most favorable comment, both in its merits as a play and on the enterprise of the management in giving the West such an expensive and elaborate cast

and production.

The author, Mr. George Broadhurst, is well known as the writer of "The Man of the Hour," one of the greatest successful dramas of the century, and this is another American drama of the present day on the same order, and it is doubted if Mr. Broadhurst's prolific pen has ever reached greater heights of dramatic achievement than in this present play.

Monroe Salisbury supported by an excellent company, numbering twenty-two people, is exceptionally capable, and the others have been chosen for their respective fitness to the characters they portray.

The massive production requiring a special baggage car to transport, is most complete and is regarded by many critics as certainly the most costly and artistic of any ever before seen in the West.

THRESHERS ORGANIZED

Henry Chambers, of Cove, returned this morning from Portland, where he was attending a gathering of the threshermen of the state who met for the purpose of organizing a state association. There were 150 delegates present, and a most enthusiastic meeting was the result. The Commercial club of Portland gave the visitors a grand banquet. There were several addresses on good roads, and taking it from every standpoint, Mr. Chambers stated the meeting was a great success; and the organization becomes stronger it will be a factor in the rebuilding of the state.

IN BEAUTIFUL SWITZERLAND

The New York World says: "A new star in the amusement world is the scenic and mechanical spectacle of 'A Day in The Alps,' representing a visit to St. Geneva, Switzerland, the favorite stopping place for tourists through that far famed country. As the curtain rises the sun is seen coming up behind the towering mountain peaks, heralding the day. St. Geneva, at the foot of the Alps, begins to take on the aspect of life and activity.

on the aspect of life and activity, flashes of lightning illuminate the sky and gives intermittent glimpses of the city. The rain falls in torrents and the storm effects which follow actually beggar description, so realistic are they. The disgruntled elements are now subdued, and, as a sign of Gods promise to his chosen people, a beautiful rainbow appears in the heavens, an indication that Jupiter Pluvius is calm.

The portrayal of the setting sun is as realistic and firelike as mother nature herself could produce, and night comes on. Tiny stars peep out from their abiding place in the firmament, and electric lights illuminate the church steeples, stores, quaint dwellings and lamp posts arranged on either side of the viaduct. The silvery moon rises magnetically over the sleeping city as the famous Switzerland chimes peal out the hour of midnight and complete a wonderful scenic, electrical and mechanical production that is often referred to as "Parker's Mechanical Masterpiece."

This attraction is now exhibiting here in connection with the maze of attractions presented by the Parker show management, and is located on Chestnut street at the intersection of Jefferson avenue, being presented as an amusement resort of their better class.

INSPECT SITE FOR THE DAM

Before 6:30 this morning a four-in-hand with Joe Woods handling the ribbons, a party consisting of, F. L. Meyers, W. H. Bohnenkamp, George Stoddard, Wm. Miller and J. D. McKennon, headed for Meadowbrook to look over the site for the big dam which will fill one of the largest natural reservoirs up the river. Accompanying the board was Engineer Humphreys, who has had experience in the Klamath Falls irrigation project.
