HAGENBECK-WALLACE DUE ON JULY SEVENTEENTH

Thousands of people have almost become cross-eyed because of efforts made to watch all that was going on in a three-ring performance. This was true the last time the Wallace show exhibited here, and now it is announced that we are again to be challenged to see all that human eyes can see under the great tents of the Wallace show, combined with the Carl Hagenbeck Trained Animal Show, the date being July 17.

The Hagenbeck trained animals composed an exhibition which became universally famous, and when Mr. Wallace combined that show with the big circus bearing his name he did not cut out a single act, but has enlarged his tents and the rings, and by crowding the acts a little closer together, oftentimes having as many as ten and twelve at one time, he has been able to present the program of the two popular shows without a single omission and without putting in a fourth ring. It is enough of a

strain to try to watch two stages and three rings, and it might have been much worse had we been called upon to encompass four rings in the horizon of our vision.

In the early portion of the Hagenbeck-Wallace performance the center ring is enclosed with a tall iron fence and in this steel arena the exhibition of the trained wild beasts take place, and be it said to the credit of the management, in spite of the frequent and furious bloody battles between the beasts or the men and the beasts that have occurred within this iron cage, never has a spectator of the show been harmed in the slightest. After the wild beasts have performed the iron fence is removed and the usual circus ring is left for the remainder of the performance, domestic animals highly trained being exhibited within the open ring, where a few moments before appeared their cousins from the African and Asiatic jungles.

OUR PLATFORM

SAFETY first, liberality next, both are essential to successful banking. If you are satisfied with our platform come and see us.

S.S.S. PURELY VEGETABLE

The absolute vegetable purity of S.S.S. has always been one of the strongest points in its favor, and is one of the principal reasons why it is the most widely known and universally used of all blood medicines. A great many of the so-called blood purifiers are really nothing more than strong mineral mixtures which act so unpleasantly and disastrously on the delicate membranes and tissues of the stomach and bowels, that even if such treatment purified the blood, the condition in which the digestive system is left would often be more damaging to the health than the original trouble. Not so with S.S.S.—it is the greatest of all blood purifiers, and at the same time is an absolutely safe and harmless remedy. It is made entirely of the healing and cleansing extracts and juices of roots, herbs and barks, each of which is in daily use in some form by physicians in their practice. Years of work and research have proven S.S.S. to contain everything necessary to purify the blood and at the same time supply the system with the purest and best tonic effects. S.S.S. cures Rheumatism, Catarrh, Sores and Ulcers, Skin Diseases, Scrofula, Contagious Blood Poison, and all other blood troubles, and it leaves the system in perfect condition when it has purified the blood. Book containing much valuable information on the blood and any medical advice desired sent free to all who write.

THE SWIFT SPECIFIC CO., ATLANTA, GA.

MOST FANS TO ATTEND

Both the Band boys and the second team players are getting in some hard practice for the game here next Sunday. Both teams realize that they are up against a hard proposition and if practice counts for anything they are both going to be up to snuff. They both place most of their dependence in the batteries and the way it looks now the game will be principally a pitcher's game although the support the pitchers will receive from the other players will not be slow. While there are a few who will not go on account of being afraid of not seeing good ball the general run of fans have expressed their delight and intentions of going. The batteries of the teams follow:

Band Boys—Williams and Ralston.

Second Team—Watson, Geddes and Ellsworth.

Cattle Die of Thirst. CITY OF MEXICO, July 9.—According to reports brought here recently by stockmen from the north-central part of the republic, thousands of head of cattle have succumbed to thirst in that section. In parts of the Mexican grazing country not a drop of rain has fallen in nearly a

year. Many streams on which cattlemen depended for watering herds have entirely dried up, and as there are few wells, the ranchmen have no alternative but to let their cattle die of thirst. The spectacle presented by the thirst-crazed animals is said to be pitiful in the extreme.

SHE'S A QUEEN! SHE'S A SIREN!

is an expression that is always heard at sight of a well developed woman. If you are flat-chested, with undeveloped, a sawny neck, thin, lead arm—remark will never be applied to you. "SIP" wafers will make you beautiful, bewitching. They DEVELOP THE BUST in a week from 3 to 6 inches and produce a fine, firm, voluptuous bosom. They fill out the hollow places, make the arms handsome and well modeled and the neck and shoulders shapely and of perfect contour.

Send for a bottle today and you'll be pleased and grateful. "SIREN" wafers are absolutely harmless, pleasant to take, and convenient to carry around. They are sold under guarantee to do all we claim or MONEY BACK.

Price \$1.00 per bottle. Inquire at good drug stores or send DIRECT TO US.

FREE. During the next 30 days only—we will send you a sample bottle of these beautifying wafers on receipt of 10c to pay cost of packing and postage if you mention that you saw the advertisement in this paper. The sample alone may be sufficient if the defects are trifling.

The Heating and Ventilating Problem Solved By the Waterbury System

For Schools, Churches, Lodge Rooms, and Public Buildings

Does away with window ventilation, which is almost as great an evil as impure air. Maintains a uniform temperature all over the room. Eliminates the cold floor problem and the "dreaded hot stove." Adds 25 per cent to the seating capacity by removing the plant to the corner. Great saving in fuel bill. Requires no basement. Always under direct supervision. No expense to install. Will burn either wood or coal. Every plant guaranteed to meet the most exacting requirements. No Experiment, Plant in successful operation in Public School of La Grande. Invented by J. L. Waterbury who for many years taught in the public schools, after carefully studying the problem and long experimenting devised and patented the system. Those seated in the farther corner of the room will be just as warm as those sitting near the plant. Can be attached to any flue. Every school district should investigate this system.

M. SNIDER, Agent, La Grande, Ore.

I have taught in the various schools of the county for the past fourteen years and the knowledge of the improper heating and ventilating conditions caused me to take this agency.
