ST. PAUL'S SCHOOL FOR GIRLS AT WALLA WALLA

This progressive school is fortunate in its location in the best residence part of Walla Walla, where its attractive buildings and ample grounds afford a pleasant home for the school family.

The courses of study have been planned for three classes of girls, viz: those who wish the best preparation for college; those who wish to complete a good general course but who do not wish to go to college; and those who wish to supplement their previous training by attendance for a year or so at a superior school. A wide range of subjects in ancient and modern language, science, history, English literature, secretarial work, etc., is open to the girl who wishes to do special work.

The teachers are refined women of character and attainments. University women who help to make the home life attractive. The days are planned carefully as to study and recreation hours, so that the work may be done comfortably as well as thoroughly.

Individual care is given the girls as to their health and needs in all directions. Younger girls of seven and upwards have special attention and help in matters of dressing, and all personal ways. Their hours of work and play are somewhat different from

those of older girls. The day school has kindergarten and primary grades and all others. College courses can be given if desired.

In music, a girl starting in the school can pursue her work unaffected by a possible change of teachers. For a Leschetisky student will always be in charge. The vocal work is under a teacher with the best foreign training, as also is the case with the languages.

The studio is in charge of a gifted woman from the Julien school, Paris. The courses offered are the same as in the Art school of New York.

A girl can begin at St. Paul's and later if she chooses to go to Chicago or New York does not suffer by the changes. The enrollment of this year was 128. The boarding department was not large but was representative of four states, Oregon, Washington, Idaho and Montana.

Several of the graduates are going to college, two to Washington University, one to Leland Stanford, one to Oberlin, etc.

The purpose of this school is to surround its students with the refined environment of a well-ordered home, and to furnish the opportunity for thorough education and liberal culture along many lines, and this purpose is obtaining recognition in many places.

OUR PLATFORM

SAFETY first, liberality next, both are essential to successful banking. If you are satisfied with our platform come and see us.

The Heating and Ventilating Problem Solved By the Waterbury System

For Schools, Churches, Lodge Rooms, and Public Buildings

Does away with window ventilation, which is almost as great an evil as impure air. Maintains a uniform temperature all over the room. Eliminates the cold floor problem and the "dreaded hot stove." Adds 25 per cent to the seating capacity by removing the plant to the corner. Great saving in fuel bill. Requires no basement. Always under direct supervision. No expense to install. Will burn either wood or coal. Every plant guaranteed to meet the most exacting requirements. No Experiment. Plant in successful operation in Public School of La Grande. Invented by J. L. Waterbury who for many years taught in the public schools, after carefully studying the problem and long experimenting devised and patented the system. Those seated in the farther corner of the room will be just as warm as those sitting near the plant. Can be attached to any flue. Every school district should investigate this system.

M. SNIDER, Agent, La Grande, Ore.

I have taught in the various schools of the county for the past fourteen years and the knowledge of the improper heating and ventilating conditions caused me to take this agency.
