LOCALS LOST THEIR GAME **CLERKS LOSES SLOW GAME**

La Grande sustained a walloping at Huntington yesterday, score 14-6. The home team was off color. Nelson was hit freely, and what is more, the Huntington swatters seemed to place their hits always. Proe, who usually plays faultless ball, was suffering with an off day. Bradley was no better, and this added to the swatting ran up the score. However, the score is not just right for about four of the scores were results of bad decisions at the home plate. The errors in judgment by the umpire, did evidently, win the game for Huntington, however, only serving to make the score larger than it justly should be.
The diamond was much faster than any thing the home team has been on this year, and this in a measure was responsible for ragged fielding.

La Grande's second team yesterday overwhelmingly defeated the Clerks in a matinee at the Lincoln playgrounds. The final score was 14 to 4. A comedy of errors on the Clerk's part was largely responsible for the one-sided score, though the small crowd got its money worth watching the contest. It was good pastime for players and audience alike.

NOTICE FOR PUBLICATION.
Department of the Interior,
U. S. Land Office at La Grande, Or.
June 21, 1909.

The Heating and Ventilating Problem Solved By the Waterbury System

For Schools, Churches, Lodge Rooms, and Public Buildings

Does away with window ventilation, which is almost as great an evil as impure air. Maintains a uniform temperature all over the room. Eliminates the cold floor problem and the "dreaded hot stove," Adds 25 per cent to the seating capacity by removing the plant to the corner. Great saving in fuel bill. Requires no basement. Always under direct supervision. No expense to install. Will burn either wood or coal. Every plant guaranteed to meet the most exacting requirements. No Experiment, Plant in successful operation in Public School of La Grande. Invented by J. L. Waterbury who for many years taught in the public schools, after carefully studying the problem and long experimenting devised and patented the system. Those seated in the farther corner of the room will be just as warm as those sitting near the plant. Can be attached to any flue. Every school district should investigate this system.

M. SNIDER, Agent, LaGrande, Ore.

I Have taught in the various schools of the county for the past fourteen years and the knowledge of the improper heating and ventilating conditions caused me to take this agency.
