**MILE OF PIPE  
DITCH DAILY**

New men and more provisions were sent to the front on the water ditch this morning by Superintendent Dutch and from now on there will be far more rapid advance on the work. With the portion of men which went up on the ditch line today, the company now has a sufficient number of workmen to build a mile of ditch each day, when the soil is so deep that solid rock does not have to be worked in.

The workmen have now reached what is known as the "saddle," a point over three miles from the intake. With about 15 miles remaining, the ditch-digging crew should be in La Grande in about two weeks. In fact this is probable, for it is not anticipated that unusually hard surface will be encountered.

No pipe has been laid yet, but it is being hauled to the front from Hilgard and laying of pipe is to commence soon.

**Look After Your Health Now.**

People who, during the winter months, usually suffer a number of attacks of "Colds" would do well to go now to an osteopath for examination and treatment. The predisposing cause of these attacks—which are simply congestions of the circulation in the mucous membranes—is usually contracted muscles or subluxated bones which interfere with the venous blood flow. The same applies, in great measure, to la grippe, bronchitis and pneumonia. Those who thus take time by the forelock will not only be less likely to suffer from the ailments mentioned, but their general health will be greatly improved.

Just one point more in regard to "colds." It is very usually the case that the chief manifestation of the trouble is at some point where the sufferer's power of resistance is below the normal—and in these cases the Osteopath frequently finds pronounced bony "lesions" that have rendered the tissues at this point more susceptible to disease. In other words, there has existed a predisposition to the trouble. Such "lesions," or misadjustments, are corrected during the course of treatment, with the result that the patient is not nearly so likely to again become a sufferer from the same cause.

Moreover, there is no doubt at all that, if treatment is begun early, the possibility of the patient contracting pneumonia, or if the "cold" developing into some other serious disease, may be completely forestalled.—Osteopathic Health.
