**STOLE FROM
A WINDOW**

Puncturing a glass front in the Councilman W. M. Monroe's store building in South La Grande, last night, what is believed to be local thieves stole a few minor articles mostly foodstuffs such as oranges, lemons and the like. No serious loss was sustained. Mr. Monroe is of the opinion today that the thieves did not enter the building, but simply took all within reach of them from the sidewalk.

Several petty thefts have been reported to the police of late from that section of the city. One man is said to have fired at robbers in his hen roost recently.

FOR SALE—One span of horses cheap. Inquire of M. A. Tompkins, Old Town. (S-25-3t)

Shriners go Home.

The special Shriners train passed through the city last evening from Baker City en route to Portland. Many of the La Grande visitors returned with it.

Look After Your Health Now.

People who, during the winter months, usually suffer a number of attacks of "Colds" would do well to go now to an osteopath for examination and treatment. The predisposing cause of these attacks—which are simply congestions of the circulation in the mucous membranes—is usually contracted muscles or subluxated bones which interfere with the venous blood flow. The same applies, in great measure, to la grippe, bronchitis and pneumonia. Those who thus take time by the forelock will not only be less likely to suffer from the ailments mentioned, but their general health will be greatly improved.

Just one point more in regard to "colds." It is very usually the case that the chief manifestation of the trouble is at some point where the sufferer's power of resistance is below the normal—and in these cases the Osteopath frequently finds pronounced bony "lesions" that have rendered the tissues at this point more susceptible to disease. In other words, there has existed a predisposition to the trouble. Such "lesions," or misadjustments, are corrected during the course of treatment, with the result that the patient is not nearly so likely to again become a sufferer from the same cause.

Moreover, there is no doubt at all that, if treatment is begun early, the possibility of the patient contracting pneumonia, or if the "cold" developing into some other serious disease, may be completely forestalled.—Osteopathic Health.
