THEEYE IMPORTANT

The eyes is one of the most import-

ant and delicate part of the body.

"Sight is Priceless". Glasses should

not be worn where no error of refraction

exists, but where an error does

exist they should be put on as soon

as possible and worn constantly until

the defect is cured. Wearing glasses

once does not signify that they will

always be worn. You can at any time

(before the defect is cured) go back

to the poorer vision if you so desire.

The vision will not be poorer than it

was before the glasses were worn, but

will be more noticeable on account of

having been accustomed to better vi-

sion. I have made a special study of

the eyes and have been fitting glasses

for fourteen years. Ask anyone who

I have fitted if I am correct as to

ability, then give me trial and

convinced. All work guaranteed.
