LUNCHEON BECOMING POPULAR

Yesterday's revival meeting marked with earnestness.

Yesterday much earnest and resultful work was accomplished in the various revival function that center around the tabernacle.

At noon there was a larger attendance than usual at the businessmen's luncheon at the Commercial Club.

The young people's meeting held in the Baptist church under the direction of Miss Harland was largely attended and the afternoon meeting at the tabernacle resulted in 30 going forward.

The evening service brought out several hundred and the best of spirit prevailed. After closing score lingered about visiting and talking over the work.

The cottage prayer meeting are not only numerous but are well attended and are resulting in the church workers getting better acquainted and more enthusiastic.

Today between 11:30 and 1 the Commercial Club parlors were alive with the business women and girls of the city, who lunched there and received an address by Miss Harland and Mrs. Johnson.

There will be another meeting this afternoon, late, at the Baptist church and the usual services at the tabernacle this evening.

People are no longer afraid of the dampness of the tabernacle, the stoves have thoroughly dried out the floors and seats and everything is as comfortable as if in a substantial building.

Tomorrow has been set aside as a day for special prayer and there will be an extra meeting in the tabernacle, commencing at 10 o'clock and lasting just one hour.

To those who think a revival cannot be held without working up to a climax of excitement should attend and notice how Evangelist Johnson gives out the invitation. He simply presents it as a straightforward business proposition that for simplicity is certainly out of the ordinary.

Sunlight After Dark

truly describes the brilliancy of this new Tungsten lamp for electric light. With the same amount of electric current its wire filament radiates from two to three times as much light as the ordinary carbon incandescent.

Use Tungsten Lamps in Your Home

They will cut your light bill in two or, double your illumination without extra cost. Try a G. E. 40-watt lamp at first. It consumes one-fifth less electric current and is twice as brilliant as the 16 candle power carbon lamp you now use.
