**SILENT AS THE FOOT OF TIME**  
**THE** whole world is fast coming to know high-class car. America, France, England Germany, Russia, Spain,---each contributes its share of praise for Mitchell beauty and construction---and patronage follows praise.

**THERE** is not a cheap feature about the Mitchell, except its price, and it has everything that makes an Automobile admired and desired.

Its is low-cost, because it is not priced on the hysterical basis, and because our facilities are so complete that we can keep down the cost of construction to where it belongs.

It is high-class because it is made of the same high-class materials that the world's highest priced cars are made of, and quality is never sacrificed for quantity.

It is beautifully designed, finished and equipped. It is rakish smart, refined, solid, comfortable and luxurious. It is silent in its running---absolutely silent---and it will last and serve you faithfully for years to come.

What more can there be to an automobile, and why should any car on earth sell for more money?

### Farm Enumerators Begin Work

Washington, March 31.--Farm enumerators will begin their work on the agricultural stock of the nation will be commissioned tomorrow and begin work preliminary to the big task which commences April 15th. Advance farm schedules, 4,000,000 copies of which have been printed, will be distributed among the farmers, so that they may know the exact questions they will be called upon to answer. Rural postmasters and carriers will assist in the distribution of the schedules.

A great increase in the accuracy of the census returns from the farmers, a considerable saving in the time of the farm enumerators, and the removal of much of whatever apprehensions and prejudices which may exist among the farmers with regard to the census are important results expected by the U. S. census bureau to follow the use of the advance farm schedule.

The employment of this advance schedule is a distinct innovation to census methods. It is the logical and practical outcome of the census bureau's persistent efforts for some time past to give the farmers a clear and comprehensive preliminary knowledge of the farm census questions and to induce them to keep written records of their farm operations and equipments in readiness for the call of the enumerators, beginning April 15th next.
