The Senior-Freshman Literary society of the high school gave a delightful program at the high school today. Music, reading and recitations comprised the numbers on the program.

Aside from a fraternal standpoint the Women of Woodcraft affair last night was considerable of a society event. The details of the affair from a fraternal standpoint are recorded on another page. Music, drills, speeches and a banquet were parts of the various features. On a nobby menu card was outlined the following list of edibles: Oranges, celery, pressed chicken, fruit salads, pickles, olives, boiled ham, cake and coffee.

Among the musical numbers delivered during the evening were solos by Mrs. T. J. Scroggin, Miss Etta Foley, Miss Nellson, Miss Della Rayburn and Miss Yunzer of Union. F. L. Meyers responded with a well-worded address for the Woodmen of the World.

RECOVER FROM POISONING
What is evidently ptomaine, poisons entire family yesterday.

Garrit Oldenburg and family who were reported to be in a serious condition as a result of poisoning, are improving rapidly today under the care of Dr. C. H. Upton.

Mr. and Mrs. Oldenburg are still confined to their beds, but their little daughter is up and around, apparently but little the worse for the experience. They are at a loss to account for the trouble, which seems to be a sort of ptomaine poisoning resulting from something the family ate on Wednesday. Dr. Upton was called early yesterday morning and George Abeg stayed at the house last night. Garrit is much improved and talked about the experience with the same old smile this morning, though he says he doesn't want to go through it again. Mrs. Oldenburg seems to be recovering more slowly but there is now no cause for alarm, and both expect to be fully recovered in a day or two.

Sunlight After Dark

truly describes the brilliancy of this new Tungsten lamp for electric light. With the same amount of electric current its wire filament radiates from two to three times as much light as the ordinary carbon incandescent.

Use Tungsten Lamps in Your Home

They will cut your light bill in two or, double your illumination without extra cost. Try a G. E. 40-watt lamp at first. It consumes one-fifth less electric current and is twice as brilliant as the 16 candle power carbon lamp you now use.
