Sunlight After Dark

truly describes the brilliancy of this new Tungsten lamp for electric light. With the same amount of electric current its wire filament radiates from two to three times as much light as the ordinary carbon incandescent.

Use Tungsten Lamps in Your Home

They will cut your light bill in two or double your illumination without extra cost. Try a G. E. 40-watt lamp at first. It consumes one-fifth less electric current and is twice as brilliant as the 16 candle power carbon lamp you now use.
