

Mitchell

SILENT AS THE FOOT OF TIME

THE whole world is fast coming to know high-class car. America, France, England, Germany, Russia, Spain,--each contributes its share of praise for Mitchell beauty and construction--and patronage follows praise.

THERE is not a cheap feature about the Mitchell, except its price, and it has everything that makes an Automobile admired and desired.

Its is low-cost, because it is not priced on the hysterical basis, and because our facilities are so complete that we can keep down the cost of construction to where it belongs.

It is high-class because it is made of the same high-class materials that the world's highest priced cars are made of, and quality is never sacrificed for quantity.

It is beautifully designed, finished and equipped. It is rakish smart, refined, solid, comfortable and luxurious. It is silent in its running--absolutely silent--and it will last and serve you faithfully for years to come.

What more can there be to an automobile, and why should any car on earth sell for more money?

DEMONSTRATED FACTS

EDW. OLNEY.

The greatest study of mankind is man. The fact that this man has delved into the inner jaws of being and is thereby enabled to perform what to many seem almost miraculous cures of all forms of diseases, has cause scientists to call him the "Marvel of the Age." He cures not what your ailment, or by whom treated, for his method has succeeded after all others have failed. All chronic sufferers should come and be healed.
