The Rinehart-Little Piano Company

Have opened the Largest and Finest Piano Store in Eastern Oregon

Our business has been phenomenal since we started. We are selling as fast as we can get them. There is a reason for that. First, we have but high grade pianos. We do not carry special pianos but direct from the best factories in America, and backed by the oldest piano manufacturers in the country.

Second, we pay cash for every instrument, thereby getting them at rock bottom prices, saving you from \$75 to \$125 on your piano.

Third, we get them in car load lots and save on freight. Every piano we sell we give a written guarantee from the manufacturer to last you for many years—a life time with proper care. When you buy a piano from the

RINEHART-LITTLE PIANO COMPANY

You will get the best piano money can buy at the lowest price for high grade pianos ever sold for in La Grande.

Have you seen the latest in player pianos? We have the latest player piano made. Has all latest attachments. With a little practice you can play the player as perfectly as the human hand. Call and see the player with the human touch. Have the demonstrator play a few of your favorite pieces.

We have a large stock of player music on hand

THE SWAN AUTO.

A Car That Will Recall Painful Occasions to Certain Actors. Some automobilists say that the reason so many auto accidents have happened of late is because the public has become used to their warning signals and fail to keep as sharp a look-

out for speeding cars as formerly. On the other hand, pedestrians declare that if there were less "joy riding" and a little more consideration shown them a few of us might be left to live out a ripe old age. Be that as it may, the inventors are now working on some new hair raising devices to warn folks that an auto is approaching, one of which is shown here.

The new car is in the shape of a mammoth swan, the eyes of which are made of prism lenses and lighted by electricity at night. There is no warning horn, bell or whistle on the new machine, but instead it emits an ear splitting hissing noise. The invention may be utilized in many other ways. For instance, we could take its hissing device to the theater and turn it on some barnstormer whose antics are displeasing.

What effect the big swan car with its glaring eyes will have on the man zigzagging homeward after a night with the "boys" can only be imagined as yet. It is safe to predict, however, that he will sit by his own fireside for weeks afterward.

What is going to happen will happen unless something sidetracks it before it gets where it is going.

A beautiful disposition if rudely jarred is apt to crack and explode.

Well meaning may be all right, but there are some persons who can be mean and mean well at the same time.

Settled Condition.
"It is terrible to be poor."
"Yes, but it has one advantage."
"What is that?"
"You know where you're at."
"Can't see the advantage."
"Well, you know you are going to stay that way, whereas if you know you are liable to have sudden and soul sickening changes."

Tales of Cities.

New York is not a city of spend-thrifts, for its savings banks have 2,870,000 depositors.

Rochester is the first city in the production of photographic supplies, output of seeds and nursery stock and optical instruments.

London is now considering a scheme for the better drainage of its streets that was first propounded by Benjamin Franklin 150 years ago—the idea of a single gutter in the middle of the thoroughfare.
