## ROUGH GRADES QUICKLY MADE

HUGE ENGINE CAN WORK ENTIRE BLOCK IN A DAY.

Rough Surface Grading Progressing with Much Dispatch on Adams

Adams avenue between Depot and Elm street is plowed up as is the block between Depot and Fourth. The steam plow breaks the upper crust and scrapers and shovels haul away and fill in as the case may be, for the center of the street has to be filled in to get the proper curve on the ground foundation. At the rate which the rough grade is being established, the entire street will be torn up before the middle of next week. Less ground than might be imagined has to be hauled off the streets after the plow has loosened it.
