THE CONGRESSMAN.

There is this about the congressional fight in the Second district, if it can be called a fight. The district is already represented by a man who is on the square, a man who never goes frantic over one thing, a man who is decidedly sane and honest, a man who has been before the people of this district and has never been found bogus.

Immediately we hear some one say, "this is all foolishness, a man can make good the first term if he is the right man." Can he? There are many things to learn in congress before a man knows how to act, before he has the routine work, before he realizes where to butt in and they all take time.

This district has a man who knows how. He is solid and without blemish. Roosevelt once said, "Old man well enough is old man good enough, let's leave old man well enough alone." And that applies very well, indeed, to the Second district of Oregon.

VISIT THE STATION AND GET ENTHUSED.

and are a little bit miserable at yourself and the world. If you get that too often opinion—"the town is slow, and there are so much better localities," just spend a few hours at the railway station in the forenoon.

Notice the trains as they arrive and depart, but pay closer attention to the number of people who stop in La Grande. See them alight from every coach and notice the hotel runner's wagons as they fill with grips.

What does it all mean? It means that you, friend, are living in one of the very best towns on the map, and you are too dense to appreciate the fact. It means that La Grande is making that steady surge forward from village to city and only a few are helping push, while the rest are laying back on the traces.

Make several trips to the depot, get the inspiration and return to your home or to your place of business with a resolution that you will do your part

to make this a city. It is cowardly and unfair to knock the town that feeds you. If you do not like the community, move on, there will be a live one to come in and take your place.

HAVE A THOROUGH UNDERSTANDING.

There is nothing like a thorough and complete understanding in this world. And in the irrigation project now before the people of the Grande Ronde, it is imperative that everyone shall be posted on all points of importance.

But objections should be raised in order that those who so sincerely favor the water plant can explain their positions and make clear every detail. The columns of the Evening Observer are open to every person who has an opinion on the district plan.

The farmers' day at Union, August 27, when the experiment station will unveil its mysteries, should be one of the truly big events of the season. Robert Withycombe, the manager of the farm, has some good things laid away for Union county farmers on that day and no one should fail to attend and hear his complete explanations of things he has tried and found good.

When anyone says the Eastern Oregon country is not a producer of wheat in extremely large quantities, they are mistaken. It has always been conceded that Umatilla county was the wheat king's paradise, but the

Grande Ronde valley is not far behind, although the Grande Ronde people have always been too modest to tell what they are doing. To prove the wheat production one has only to look over the numerous flouring mills running overtime and also take note of the grain buyers' contracts.
