CHAMPION STAR FINDER.

Astonishing Record of Mrs. Fleming, Harvard's Famous Astronomer.

It is a curious fact that, although men have had the field of astronomy to themselves for ages, the world's champion discoverer of stars is a woman. This very considerable distinction belongs to Mrs. Williamina P. Fleming, curator of photographs at the Harvard observatory, who has just discovered a new star. It is the fifteenth to be found in the last twenty-five years, and nine of these were discovered by Mrs. Fleming from photographs.

Mrs. Fleming is the only woman whose name has ever appeared in the catalogue of Harvard university. In

MRS. WILLIAMINA P. FLEMING.

this record, with the names of former President Eliot, Professor Edward C. Pickering, director of the Harvard astronomical observatory, and many other names that stand for high attainment along various lines, that of Mrs. Fleming is written as curator of astronomical photographs.

In spite of the talk about extravagance, in spite of the debate about the life of the automobile, business, the man with a car goes spinning and winning on his way.

A GOOD MOTOR CAR EARNS ITS KEEP

Yes, and a good car pays a high rate of interest on the original investment, too.

Nearly all the cars you see bearing pleasure parties at night have been working all day. They have earned their way.

If the automobile did not earn its way, it wouldn't last. Does the average business man keep on putting his money into unprofitable things?

Have you ever known a man who once owned a car willing to give up ownership? The man who once had the service of a car knows that without one he would feel as though he had lost a leg.

The man without a car these days is at a distinct disadvantage in comparison with the man who has one.

The automobile is typical of his age—the age of efficiency and rapid progress.

Men have not made any other thing in all their history which will render so much genuine service in a given length of time as the automobile.

The man with a good car only smiles to himself when he hears two men who never drove a car debating how long the automobile business is going to last.

He smiles again when his neighbor says: "I don't see how you can afford to keep up an automobile."

He smiles because he sees his neighbor has been taking the funny papers seriously, which is always a funny thing to do.

Have you ever noticed those pictures in the funny papers about automobile troubles and expenses? Ever notice how the automobiles shown are of the models of ten years ago? That shows how old the jokes are.

In spite of the talk about extravagance, in spite of the debate about the life of the automobile business, in spite of the funny papers, the man with a car smiles, "starts 'er up," and goes spinning and winning on his way, well pleased with himself that he has so good and faithful a servant as his motor car. good round sum—and then does he go back to the horse and buggy and the street car? Hardly.

He gets "reckless" again and buys another motor car—a better one. He is able to buy a better one for the same or less money than he spent before, because the manufacturers from year to year learn how to improve and refine their products. Thus are prices constantly lowered. You can buy more for the same price this year than you bought last.

In fact, you can now buy all that any one needs in a five passenger car for as low a price as \$1500—it is a quality car, too.

In addition to the design, materials and workmanship necessary to insure perfect performance, this car has what many critics consider the most beautiful lines of any automobile in the world; and further, it has the refinements and the finish to suit the most fastidious taste.

Let us demonstrate the new model for you.

Touring car, five or seven seats; Torpedo, four seats.

Roadster, two, three or four seats.
