**SNAKE LINE TO
BE BUILT**

**LINE TO BE COMPLETED TO
CLARKSTON SAYS REPORT.**

**Amalgamation of Companies Indicates
Completion of Proposed Line.**

Lewiston, Dec. 2.—The filing of certified articles of incorporation of the Oregon-Washington Railroad & Navigation Co., the holding company of the Harriman interests, which has just been formed, for the first time officially discloses the fact that the Huntington-Lewiston extension is to be constructed to Clarkston, where terminal grounds, right of way and depot grounds have but recently been purchased under cover, and from that point a bridge is to be built across the Snake river near Lewiston to connect with the Lewiston-Riparia line, now operated by the Camas Prairie railroad company. Lewiston is designated as the principal place of business in Idaho.

The principal feature in connection with the filing of the articles that vitally affect the Lewiston country is contained in the section describing the lines under construction and to be constructed, and says: "The constructed and partially constructed and projected railroad and telegraph lines now owned, constructed by the Northwestern railroad company from a point on the Oregon Short Line railroad company, about two miles east of Huntington, Ore., and extending along the Snake river via Clarkston, Wash., and crossing the Snake river to a point of connection with constructed line of Oregon, Washington & Idaho Railroad Co., near Lewiston, Idaho."

How to Stop Drinking.

It was formerly customary for the habitual drinker to take the pledge regularly, sometimes once a year, and sometimes in every fit of remorse that followed his debauches, and then—Break it.

But now it is gradually dawning on the world that pledges do not stop drunkenness. The nervous system of the habitual drinker is diseased and he must have treatment that will cure the drink habit of the money will be refunded. Can be given secretly.

Science Siftings.

Sir William Ramsay has made a pair of scales that will weigh one-seven-billionth of an ounce.

A French scientist says the nervous system is capable of perceiving only about ten impressions a second, separated by periods of inertia.

Professor Arthus at the Society of National Sciences at Lausanne announced that people bitten by venomous snakes can be kept alive eight or ten hours simply by subjecting them to artificial respiration.
