The Leading Physicians of La Grande are now sending all of their patients to me when they suspect eye strain. Three Years in La Grande and All My Glasses Giving Satisfaction.

THE one great cause of eye disease is eye strain. Diseases of the eye which causes blindness, are caused by imperfect circulation of the blood in and around the eye.

THIS poor circulation can nearly always be traced to over use or strain of the eyes, by using them under improper conditions.

THE strain thus produced causes irritation and congestion of the delicate nerves and muscles of the eye, and an imperfect blood supply results.

A general weakness of all the nerves and muscles of the eye is the result of this imperfect blood supply, and the circulation may be cut off entirely from certain parts.

IF from the OPTIC NERVE, the result is paralysis, either partial or complete. If from the lens of the eye, CATARACT results.

ANY other eye disease may result from a like cause, according to the part affected.

AN INJURY will act in the same way by interfering with the circulation.

WHEN you consider the intricate mechanism of this delicate organ, with its numerous muscles, nerves, and blood vessels, you realize how easily its usefulness may become impaired.

GLASSES THAT I FIT RELIEVES THIS EYE STRAIN.

I make a special study of the art of fitting glasses and assume the entire responsibility, not only for the correctness of the lense, but also for the accuracy of the prescription. My work combines that of both oculist and optician so far as prescribing and fitting glasses are concerned.
