**An M. & M. Announcement.**

The Island City M. & M. company, agents for the E. M. F. line of automobiles, say that the new Flanders, fore-door, five-passenger touring car, with three speeds, forward and reverse, at \$925 F. O. B. La Grande for standard equipment stamps these cars in a distinct class without a successful competitor, for it is impossible to find its equal in price and actual automobile value.

Greater power and greater strength with a minimum of weight, and absolute reliability of engine, and general make up, together with the graceful lines and down to the minute details of body and chassis construction make them a "thoroughbred" that any automobile man will be proud of.

They expect to have one of these remarkable cars on exhibition about the 20th of April, and also a few of the celebrated E. M. F. 50's.

You will never regret waiting to see these cars before ordering.

**"I would Be Glad to Trade my Outside Investments for Imbler Fruit Land."**

This was the remark recently made by a man in the Grande Ronde valley who listened and was tempted by the oily agents for wireless stock, the dignified agents for Portland city lots, the talkative men for Seattle and Tacoma additions.

He bought some of all of them, believing the great chance to make money was in another man's game. Now, he has awakened to the fact that "hills look green far away" but that home securities and home investments that can be locked after occasionally beat anything offered by the "fly-by-night" agent. This man now realizes that there is plenty of money on the coast to grab anything that looks like an investment destined to return big dividends. Men do nothing but watch for such things in money centers and they never let the good things get away.

What do they market away from home?

Here it is: Several men go in together and get options on a piece of property. Little money is put up except for hiring salesmen. This "syndicate" hires the best talent obtainable, gets out glowing literature with pretty pictures and starts operation in the interior country.

One salesman said to a friend recently: "I always like to sell from a blue print. It is far more attractive than the property and besides the rough land, ravines and brush piles do not show up on the print."

This syndicate pounds at their salesmen who work very hard and the result is that the addition or what ever it may be is finally unloaded and the stockholders of the syndicate pocket a handsome profit, while the people holding contracts cannot under any circumstances sell their lots at what they paid for them.

The man referred to has bought something of all offerings made by the outside men lately and he is through. He now admits he would like to trade his entire holdings for Imbler fruit land.

Is it not likely there will be others who will gladly make the same offer after they investigate what they have been buying?

Bear in mind, there is nothing so staple as fruitland, nothing so sure of bringing returns and at all times having a full value in your security. The man with a few hundred dollars can now handle such land with as secure protection as can the man with thousands.

Investigate what is being offered to you right here at home before you send another dollar from this community.

Those having meritorious fruitland investment offerings in the Imbler district are:

- G. L. Cleaver,
- La Grande Investment Co.
- Wenaha Lumber Co.
- Sherwood Williams,
- Hill & Hibbard.
