### COMMERCIAL VALUE OF DWARF FRUITS.

"The dwarf fruit as a commercial proposition is still in an experimental condition in this state" said Prof. C. I. Lewis, horticulturist of the Oregon Agricultural college, in a recent discussion of the fruits of the state. "The dwarf pear," he continued, "looks quite promising to be used in plantings by itself, or as a filler. There is one dwarf pear orchard

stock than with the standard.

"Dwarf" peaches are also being grown; these come into bearing quite heavily the first year. There are several plantings in this state, and it will only be a short time before we will know more of these.

"The dwarf apple has been tried very sparingly. When it is put on Paradise stock it is more of a curiosity, but when planted on the Doucin stock it may make a satisfactory tree for western Oregon.

"The dwarf fruit offers a splendid opportunity for home garden, and a good conservative field for trial in the commercial orchard."
