## Think This Over, Mr. Married Man

How many hours a day does your wife spend in the kitchen?

Do you know that every minute spells drudgery these hot days?

Can you expect her to be happy and cheerful when the oven-like heat is robbing her of health and good looks? Of course, you must eat even if it is hot, and meals must be ready on time, but honestly now, don't you feel sorry for her, slaving over a hot stove?

Then, why not buy her an Electric Range?

She can get the meals in half the time and in a cool kitchen. And there is no fuel to handle or ashes to fuss with. Think what that means.

And we'll make you a special rate on electricity so that your fuel bill will be about the same as you pay now for wood.

Can you think of anything that will please your wife more? Drop in and talk it over, or call Main 34.
