### MEN TO RETURN TO WORK WITH GOOD WAGES PROMISED

### SICKNESS LIKELY TO FOLLOW LOW SALE OF DECAYED FOOD

Critical Situation in London Abated by Concessions Made by Employers—Hundred Thousand Men Involved in the Struggle When Peace Is Effected—Strike's Outcome Called the Century's Greatest Victory.

London, Aug. 12.—Jubilant because of peace efforts and that tradesmen have gained them most of their demands, strikers by the thousand, who had paralyzed London's trade, returned to work today. Wood and ice is being moved ahead of all, but many ships' cargoes were found to be spoiled.

Lightermen get a 10 hour day, and an increase of 25 per cent in wages. Dockers and teamsters also gain an increase. Over 100,000 workmen have been affected.

Ben Tillet, leader of the strikers, said the result of the strike is the greatest labor triumph of the century. Teamsters of the Midland and Great Northern railway will strike today after declaring that the settlement of the London strikers does not affect them.

Danger of sickness through the sale of partly decayed food which jams the docks and ships, has stirred the health authorities to action. All foodstuffs this is tainted has been ordered dumped into the sea.

### Purser Travels Far.

New York, Aug. 12.—A new record for ocean travel, or for that matter, for travel of any kind, so far as human being are concerned, has just been made here by the purser of one of the transatlantic liners plying regularly between this port and Europe, who has just completed his thousandth trip across the Atlantic. These thousand trips represent about 3,500,000 miles of travel, far surpassing any other achievement of the sort of which any record can be found. The thousand trips are equal to 140 trips around the earth and about 15 trips to the moon. Of course, not all these trips were made on the same vessel, nor was their accomplishment a quick one since the purser in question has been traveling the Atlantic since 1864, or for nearly half a century. His first trip was of a nature to discourage any but the most enthusiastic lover of the sea, since it was made on a steamship which took fire on its way to this country and was only saved after all hope had been abandoned. Altogether it is likely that it will be long before this 3,500,000 miles record will be beaten, even with the greatly increased speed of the present day liners.
